## Management Discussion of Fund Performance

### Investment Objectives and Strategies

The investment objective of TD Comfort Conservative Income Portfolio (the "Fund") is primarily to seek to provide income with a secondary focus to provide a modest potential for long-term capital growth. In seeking to achieve this objective, the Fund uses a strategic asset allocation strategy to invest the majority of its assets in securities of TD Mutual Funds, with an emphasis on mutual funds with income generating potential, and may also invest in exchange-traded funds, debt securities and other income-generating securities. The Fund's neutral asset allocation will generally provide exposure to 80% fixed income and 20% equities. The asset allocation will generally be maintained within ranges of 70% to 90% for fixed income and 10% to 30% for equities. The Fund may use derivatives to, among other things, reduce the risk associated with currency fluctuations, gain indirect exposure to securities or provide downside risk protection.

### Risk

The risks of investing in the Fund remain as outlined in the simplified prospectus.

### Results of Operations

The Investor Series units of the Fund returned 7.6% for the year ended December 31, 2024 (the "Reporting Period"), versus 8.6% for the Fund's product benchmark and 4.2% for the Fund's general market index. The Fund's product benchmark is comprised of 80% FTSE Canada Universe Bond Index, 15% MSCI World Index (Net Dividend, C\$) and 5% S&P/TSX Composite Total Return Index. The Fund's general market index is the FTSE Canada Universe Bond Index. Unlike the product benchmark and general market index, the Fund's return is quoted after the deduction of fees and expenses. Returns for other series of the Fund may vary, largely due to differences in fees and expenses. Refer to the Past Performance section for returns of various series of the Fund.

### Market Update

Canada's economy came under pressure over the Reporting Period, largely as a result of tight financial conditions. Consumer spending, real estate activity and the labour market weakened. At the same time, inflationary pressures softened, moving closer to the Bank of Canada's ("BoC") 2% target. In response, the BoC began lowering interest rates in June 2024 and continued to lower rates over the remainder of the year. Overall, the BoC lowered its benchmark overnight interest rate by 1.75% to 3.25%. The BoC also suggested it would gradually lower interest rates further in 2025, hoping that looser financial conditions could ease the burden on Canadian households and help reignite consumer spending. There was also some expectation that rising demand could kickstart business activity, potentially resulting in improved job growth.

Canadian bond prices increased over the Reporting Period, with yields moving lower. The BoC's interest rate decreases helped push down Canadian bond yields, particularly those at the shorter end of the yield curve. The benchmark 10-year Government of Canada bond yield

rose from 3.11% to 3.22%, with much of the gains coming early in the Reporting Period before the BoC lowered interest rates. Short-term bond prices outperformed their mid- and long-term counterparts. Corporate bond prices rose and outperformed government bonds, which also increased. Credit spreads (the difference in yields between corporate and government bonds with similar maturities) narrowed.

### Key Contributors/Detractors Relative to the Product Benchmark

During the Reporting Period, the Fund generated a positive return and outperformed its product benchmark before the deduction of fees and expenses.

- The Portfolio Adviser's preference for global equities over fixed income contributed to performance as this strategy capitalized on strength in the global equity markets.
- The Fund's exposure to TD U.S. Dividend Growth Fund was a major contributor to performance, as was its exposure to global information technology positions through TD Global Technology Leaders Index ETF.
- Within fixed income, the Fund's exposure to TD Canadian Core Plus Bond Fund contributed to performance owing to the underlying fund's bias toward corporate credit over government bonds.
- The Fund's exposures to TD International Equity Focused Fund, TD Global Capital Reinvestment Fund and TD Global Low Volatility Fund detracted from performance relative to global equities, as stock selection across these underlying funds weighed on performance.

### Key Contributors/Detractors Relative to the General Market Index

The Fund's exposure to equity markets compared to the general market index contributed to performance as equities outperformed fixed income over the Reporting Period.

### Recent Developments

The Portfolio Adviser expects the economic backdrop to improve in 2025 as the effects of the 2024 interest rate cuts should begin to materialize. This is expected to create a supportive backdrop for earnings growth and, by extension, equity market performance. However, the Portfolio Adviser remains mindful as certain risks to the global outlook persist. Geopolitical tensions, the potential re-emergence of inflationary pressures and trade tariffs may introduce heightened short-term volatility. Despite these risks, central banks are still expected to reduce policy interest rates in 2025, although the pace of easing will likely be gradual given the resilient economic environment.

The Portfolio Adviser expects stocks to continue outperforming bonds but maintains a balanced approach given the current bifurcated outlook. Within fixed income, the underlying funds remain focused on high-quality corporate bonds over government bonds to enhance yield and manage risk. In equities, the underlying funds are positioned with biases toward global equities, particularly U.S. equities, reflecting the Portfolio Adviser's positive outlook for these markets.

During the Reporting Period, the Portfolio Adviser introduced private infrastructure and real estate investments as part of the Fund's diversification strategy. In the Portfolio Adviser's view, these investments should improve the Fund's risk-adjusted return potential and align with the Portfolio Adviser's disciplined approach to diversifying across asset classes.

### Related Party Transactions

Affiliates of TD Asset Management Inc. ("TDAM") may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as in connection with banking (including deposit taking), custody, securityholder account maintenance and reporting, brokerage and derivatives transactions.

#### *Manager, Trustee and Portfolio Adviser:*

TDAM, a wholly-owned subsidiary of The Toronto-Dominion Bank ("TD"), is the manager, trustee and portfolio adviser of the Fund. The Fund pays TDAM an annual management fee, which may vary for each series of the Fund. The Fund also pays TDAM an annual administration fee of 0.12% with respect to Investor Series and D-Series units and 0.03% with respect to G-Series units of the Fund, calculated and accrued as a percentage of the net asset value. The Fund may hold underlying fund(s) managed by TDAM for which TDAM may be paid a fee. However, no management fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the underlying fund(s) for the same services.

#### *Distributor:*

TD Investment Services Inc. is the principal distributor of the Investor Series units of the Fund, for which it is paid a trailer commission by TDAM. Units of the Fund are also distributed through brokers and dealers including TD Waterhouse Canada Inc. ("TDWCI"), a wholly-owned subsidiary of TD. TDWCI, like other dealers, is paid a trailer commission by TDAM for distributing certain series of units of the Fund. Trailer commissions are paid by TDAM out of the management fees it receives from the Fund and are based on the average value of assets held by each dealer.

#### *Registrar and Transfer Agent:*

TD is the registrar and transfer agent of the Fund, and as such maintains all unitholder records, processes purchase, switch, conversion and redemption orders, issues investor statements and prepares annual tax reporting information on behalf of the Fund.

TD earns a foreign exchange spread when unitholders switch between units of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with TD for which TD earns a fee.

#### *Custodian:*

TD is the sub-custodian of the Fund and may hold a portion of the assets (including cash and investments) of the Fund.

#### *Buying and Selling Securities:*

TDAM has established an independent review committee ("IRC") which acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals respecting any conflict of interest matters referred to it by TDAM. The IRC prepares, at least annually, a report of its activities for securityholders of the Fund. The report is available on the TDAM website at [www.td.com/ca/en/asset-management](http://www.td.com/ca/en/asset-management) or at the securityholder's request at no cost by contacting TDAM (see front cover).

The Fund and/or underlying fund(s) in which the Fund invests relied on standing instructions from the IRC in respect of one or more of the following transactions:

- (a) trades in securities of TD or any affiliate or associate thereof;
- (b) investments in the securities of an issuer where TD Securities Inc., TDWCI, or any other affiliate of TDAM (a "Related Dealer") acted as an underwriter during the distribution of such securities and the 60-day period following the completion of the distribution of the underwritten securities;
- (c) purchases or sales of securities of an issuer from or to another investment fund or discretionary managed account managed by TDAM; and
- (d) purchases of securities from or sales of securities to a Related Dealer, where it acted as principal.

The relevant standing instructions require that securities transactions with related parties conducted by TDAM (i) are free from any influence by an entity related to TDAM and without taking into account any consideration relevant to an entity related to TDAM; (ii) represent the business judgment of TDAM uninfluenced by considerations other than the best interests of the Fund and/or underlying fund(s); (iii) comply with the applicable policies and procedures of TDAM; and (iv) achieve a fair and reasonable result for the Fund and/or underlying fund(s).

## Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five fiscal years, as applicable. For series that commenced operations during any of the periods presented, the data reported for that period represents results from the commencement of operations (as disclosed in the Past Performance section) to the end of that reporting period.

¹ This information is derived from the Fund's audited annual financial statements prepared in accordance with International Financial Reporting Standards. The Fund measures fair value of its investments based on close market prices, where the close market price falls within the bid-ask spread or based on quotations from recognized dealers. As such, the Fund's accounting policies for measuring the fair value of investments in the financial statements are substantively consistent with those used in measuring the net asset value ("NAV") for transactions with unitholders.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial periods. These tables are not intended to be a reconciliation of the net assets per unit.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

<sup>1</sup> This information is provided as at December 31 of the past five fiscal years, as applicable.

<sup>2</sup> Management Expense Ratio ("MER") is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) net of any waivers or absorptions for the stated period, including the Fund's proportionate share of the MER, if any, of the underlying fund(s) in which the Fund has invested in, and is expressed as an annualized percentage of daily average NAV during the period. Management Expense Ratio Before Waivers or Absorptions is based on total expenses and excludes the management fees on the portion of the NAV the Fund invests in the underlying funds that are managed by TDAM or its affiliates. There will be no duplication of management fees paid to TDAM or its affiliates. Any waivers or absorptions may be discontinued at any time by TDAM at its discretion without notice.

<sup>3</sup> The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the stated period. Where a Fund invests in units of any underlying fund, the TER presented for the Fund includes the portion of TERs, if available, of the underlying fund(s) attributable to this investment.

<sup>4</sup> The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio adviser manages its investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the stated period. The higher a fund's PTR, the greater the trading costs payable, directly or indirectly, by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the fiscal year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

As manager and trustee of the Fund, TDAM is responsible for the overall business and affairs of the Fund, including activities related to making units of the Fund available to investors, and providing, or arranging for the provision of, investment advisory services and marketing services to the Fund. In consideration for the provision of such services, each series of the Fund, other than G-Series units, pays TDAM a management fee.

Management fees are calculated and accrued on a daily basis for each applicable series based on the net asset value of that series and paid monthly to TDAM.

The simplified prospectus discloses a specified annual management fee rate that TDAM can charge for each series of the Fund. Where TDAM chooses to charge a management fee rate below the specified annual management fee rate, the difference represents a waiver of management fees. TDAM may waive all or a portion of the management fees being charged to the Fund, which may be discontinued at any time by TDAM at its discretion without notice to unitholders.

The annual management fees and a breakdown of the major services rendered for each series, as a percentage of the management fees paid, are as follows:

(expressed as a %)	Annual Mgmt. Fees*	Dealer Compensation	Waived Operating Expenses	Other†
Investor Series	1.25	60.12	0.04	39.84
F-Series	0.50	0.00	0.08	99.92
D-Series	0.50	0.00	0.09	99.91
G-Series	0.00	N/A	N/A	N/A

There are no management fees paid by the Fund in respect of G-Series units of the Fund. Unitholders in the G-Series pay a negotiated fee directly to TDAM.

\* Includes management fees paid by the Fund and the proportionate management fees, if any, of the underlying fund(s) managed by TDAM held by the Fund. However, no management fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the underlying fund(s) for the same services.

## Caution regarding forward-looking statements

Certain portions of this report, including, but not limited to, “Results of Operations” and “Recent Developments”, may contain forward-looking statements including, but not limited to, statements about the Fund, its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable. Accordingly, assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and relevant market factors in North America and internationally, interest and foreign exchange rates, equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events.

The above mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing any undue reliance on forward-looking statements. Further, there is no specific intention of updating any forward-looking statements contained herein whether as a result of new information, future events or otherwise.
