TD Mutual Funds Annual Management Report of Fund Performance

for the period ended December 31, 2024

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, at no cost, by calling 1-800-386-3757, by writing to us at TD Asset Management Inc., P.O. Box 100, 66 Wellington Street West, TD Bank Tower, Toronto-Dominion Centre, Toronto, Ontario, M5K 1G8, or by visiting our website at www.td.com/ca/en/asset-management or the SEDAR+ website at www.sedarplus.ca.

Securityholders may also contact us or visit our website to get a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure at no cost.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The investment objective of TD Global Tactical Monthly Income Fund (the "Fund") is to seek to earn income and capital appreciation by investing primarily in, or gaining exposure to, income-producing securities of issuers from anywhere in the world. In seeking to achieve this objective, the Fund invests primarily in, or gains exposure to, a diversified portfolio of income-producing securities, which may include, but are not limited to, government and corporate debt obligations, dividend-paying common shares and preferred shares, exchange-traded funds including those that seek to replicate the performance of gold, other investment funds managed by TD Asset Management Inc., as well as real estate investment trusts, other evidences of indebtedness (including investments in loans) and other similar income-producing instruments from anywhere in the world. The Portfolio Adviser may hedge any or all foreign currency exposure in the Fund. The Portfolio Adviser may shift between different asset classes to favour areas that are expected to have higher potential returns while seeking to avoid or minimize exposure to areas with greater risk of loss.

Risk

The risks of investing in the Fund remain as outlined in the simplified prospectus.

Results of Operations

The Investor Series units of the Fund returned 19.4% for the year ended December 31, 2024 (the "Reporting Period"), versus 12.6% for the Fund's product benchmark. The Fund's product benchmark is comprised of 50% Bloomberg Multiverse Total Return Index (C\$) and 50% MSCI World High Dividend Yield Index (Net Dividend, C\$). The Fund's general market indices, the Bloomberg Multiverse Total Return Index (C\$) and the MSCI World Index (Net Dividend, C\$), returned 7.6% and 29.4%, respectively. Unlike the product benchmark and general market indices, the Fund's return is quoted after the deduction of fees and expenses. Returns for other series of the Fund may vary, largely due to differences in fees and expenses. Refer to the Past Performance section for returns of various series of the Fund.

Market Update

The global economy expanded over the Reporting Period, albeit at a relatively muted pace. Tight financial conditions weighed on consumer demand, hindering trade and business activity. Several major central banks began lowering interest rates in response to softer inflationary pressures and moderating economic conditions. The U.S. economy showed its relative strength, lifted by a resilient U.S. consumer. The U.S. labour market lost some momentum, with the unemployment rate moving higher. With a slower labour market and falling inflation rate, the U.S. Federal Reserve Board lowered its benchmark interest rate by 1.00% to a target range of 4.25%-4.50%. Economic activity in China was relatively stable yet underwhelming, continuing to be negatively impacted by soft domestic demand and a weak property market. China's government provided some fiscal stimulus measures

and pledged to provide more in 2025, while the People's Bank of China lowered several interest rates to help support China's economy.

Europe's economy expanded at a relatively modest pace over the Reporting Period. Consumer and business activity continued to be weighed down by tight financial conditions. The European Central Bank lowered interest rates four times, taking its benchmark interest rate to 3.15%. Economic activity in Germany, Europe's largest economy, was weak. Struggles in Germany's key manufacturing sector persisted, which weighed on trade activity and overall economic conditions. In the U.K., the Bank of England lowered its benchmark interest rate from 5.25% to 4.75% in response to falling inflation and relatively weak economic growth. After contracting in the first quarter of 2024, Japan's economy expanded over the second and third quarters, benefiting from higher trade activity. Unlike many other economies, Japan's inflation rate remained elevated, showing little signs of coming down. In response, the Bank of Japan ("BoJ") raised interest rates twice, taking its benchmark interest rate to 0.25%. This was the BoJ's first interest rate increase in 17 years.

Global equity markets posted a strong gain over the Reporting Period. Information technology stocks, particularly heavyweights in the U.S., drove market performance on strong progress from the development of artificial intelligence ("AI") capabilities. U.S. equity markets advanced, with 10 of 11 sectors delivering a positive return. Communication services, information technology and consumer discretionary were the strongest-performing sectors, while materials, health care and real estate were the weakest performers.

Chinese equities increased over the Reporting Period, getting a boost from the government's announcement to help support China's economic activity. The financials and information technology sectors drove gains for China's equity markets. European equities posted a relatively solid gain. Financials and industrials were among the top-performing sectors in European equity markets. Among European countries, Italy, Germany and Spain were the top performers. U.K. equities advanced, lifted by gains in the financials and industrials sectors. Japanese equities also gained, benefiting from the strong performance of the financials and energy sectors.

Canada's economy came under pressure over the Reporting Period, largely as a result of tight financial conditions. Consumer spending, real estate activity and the labour market weakened. At the same time, inflationary pressures softened, moving closer to the Bank of Canada's ("BoC") 2% target. In response, the BoC began lowering interest rates in June 2024 and continued to lower rates over the remainder of the year. Overall, the BoC lowered its benchmark overnight interest rate by 1.75% to 3.25%. The BoC also suggested it would gradually lower interest rates further in 2025, hoping that looser financial conditions could ease the burden on Canadian households and help reignite consumer spending. There was also some expectation that rising demand could kickstart business activity, potentially resulting in improved job growth.

Canadian bond prices increased over the Reporting Period, with yields moving lower. The BoC's interest rate decreases helped push down Canadian bond yields, particularly those at the shorter end of the yield curve. The benchmark 10-year Government of Canada bond yield rose from 3.11% to 3.22%, with much of the gains coming early in the Reporting Period before the BoC lowered interest rates. Short-term bond prices outperformed their mid- and long-term counterparts. Corporate bond prices rose and outperformed government bonds, which also increased. Credit spreads (the difference in yields between corporate and government bonds with similar maturities) narrowed.

Key Contributors/Detractors Relative to the Product Benchmark

The Fund generated a positive return and outperformed its product benchmark over the Reporting Period.

- The Portfolio Adviser's preference for equities over fixed income contributed to the Fund's performance.
- Stock selection within the information technology sector added to returns owing to the Fund's positions in two American semiconductor companies that are leaders in the AI wave, an enterprise software provider of technology service management solutions, and a provider of hardware and software solutions for infrastructure security, all of which continued to exhibit robust business momentum.
- Stock selection within the communication services sector added to returns as a result of owning a company involved in the development of social media applications and an American telecommunications provider, the second-largest wireless carrier in the U.S., both of which outperformed the product benchmark.
- Stock selection within the consumer discretionary sector was a source of strength owing to the Fund's position in a Japanese entertainment and content intellectual property company, an Italian manufacturer of luxury vehicles and a global chain of hotels, all of which returned over 35%.
- Within the real estate sector, the Fund's ownership in a Japanese real estate holding company detracted from performance.

Key Contributors/Detractors Relative to the General Market Indices

The Fund's exposure to fixed-income securities detracted from performance relative to the MSCI World Index (Net Dividend, C\$). The Fund's exposure to equities contributed to performance relative to the Bloomberg Multiverse Total Return Index (C\$).

Assets

The F-Series units experienced a significant increase in assets due to investor purchase activity.

Recent Developments

International markets underperformed the U.S., particularly after President-Elect Donald Trump's election win, given that his policy proposals favour domestic growth, and the U.S. dollar has strengthened sharply since the election. With Trump's upcoming inauguration, the Portfolio Adviser expects that the U.S. will undergo several major policy shifts around trade, tariffs and immigration. These shifts could have major ramifications for the global economy.

Heading into 2025, the Portfolio Adviser expects diverging growth trends amongst global regions. In the U.S., a resilient consumer, healthy corporate sector, rising productivity and the potential impact of further deregulation under the new administration should keep economic growth on a strong path. Countries like Germany, France and China are facing significant growth challenges in the form of political uncertainty, deflation risks, weak consumption and a potential manufacturing recession. Although growth should remain uneven heading into next year, the Portfolio Adviser's overall global growth outlook remains positive amid U.S. strength, robust financial markets and accommodative central bank policies. While a strong U.S. dollar has created some concerns for the global economy, the Portfolio Adviser believes this also presents an opportunity within the Fund's current investment framework, which seeks out companies that will outperform in dynamic market conditions.

The Portfolio Adviser will be monitoring several factors that influence market performance, including earnings momentum, potential trade frictions, geopolitics and state of conflicts in Europe and the Middle East, and the technology-driven investment boom. On balance, the Portfolio Adviser believes that U.S. equities remain the preferred investment destination, as the country exhibits resilience and is potentially entering the mid-cycle stage of a sustained economic cycle. While some parts of the world may be facing challenges, positive signs are also emerging in parts of the globe.

The Fund remains invested in the big-picture themes like AI, data centres, travel and consumer resilience, and in high-conviction ideas that will likely see faster acceleration of free cash flows in the current environment. Within the equity portion of the Fund, the Portfolio Adviser has added to cyclical exposures and reduced the Fund's defensive exposures. Within the fixed-income portion of the Fund, duration (sensitivity to interest rate changes) exposure has been reduced to a modest underweight. Regarding the Fund's asset allocation, fixed-income exposure has been reduced, as the Portfolio Adviser believes the current investing environment favours equities. The Fund is invested in high-quality companies that the Portfolio Adviser believes can continue to grow and compound their income streams.

Related Party Transactions

Affiliates of TD Asset Management Inc. ("TDAM") may earn fees and spreads in connection with various services provided to, or transactions with, the Fund, such as in connection with banking (including deposit taking), custody, securityholder account maintenance and reporting, brokerage and derivatives transactions.

Manager, Trustee and Portfolio Adviser:

TDAM, a wholly-owned subsidiary of The Toronto-Dominion Bank ("TD"), is the manager, trustee and portfolio adviser of the Fund. The Fund pays TDAM an annual management fee, which may vary for each series of the Fund. The Fund also pays TDAM an annual administration fee of 0.08%, calculated and accrued as a percentage of the net asset value, with respect to the Investor Series, Premium Series, Advisor Series, H8 Series, T8 Series and D-Series units of the Fund.

Distributor:

Certain series of units of the Fund are distributed through brokers and dealers including TD Waterhouse Canada Inc. ("TDWCI"), a wholly-owned subsidiary of TD. TDWCI, like other dealers, is paid a trailer commission by TDAM for distributing certain series of units of the Fund. Trailer commissions are paid by TDAM out of the management fees it receives from the Fund and are based on the average value of assets held by each dealer.

Registrar and Transfer Agent:

TD is the registrar and transfer agent of the Fund, and as such maintains all unitholder records, processes purchase, switch, conversion and redemption orders, issues investor statements and prepares annual tax reporting information on behalf of the Fund.

TD earns a foreign exchange spread when unitholders switch between units of funds denominated in different currencies. The Fund also maintains bank accounts and overdraft provisions with TD for which TD earns a fee.

Custodian:

TD is the sub-custodian of the Fund and may hold a portion of the assets (including cash and investments) of the Fund.

Buying and Selling Securities:

TDAM has established an independent review committee ("IRC") which acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals respecting any conflict of interest matters referred to it by TDAM. The IRC prepares, at least annually, a report of its activities for securityholders of the Fund. The report is available on the TDAM website at www.td.com/ca/en/asset-management or at the securityholder's request at no cost by contacting TDAM (see front cover).

The Fund relied on standing instructions from the IRC in respect of one or more of the following transactions:

- (a) trades in securities of TD or any affiliate or associate thereof;
- (b) investments in the securities of an issuer where TD Securities Inc., TDWCI, or any other affiliate of TDAM (a "Related Dealer") acted as an underwriter during the distribution of such securities and the 60-day period following the completion of the distribution of the underwritten securities;
- (c) purchases or sales of securities of an issuer from or to another investment fund or discretionary managed account managed by TDAM; and
- (d) purchases of securities from or sales of securities to a Related Dealer, where it acted as principal.

The relevant standing instructions require that securities transactions with related parties conducted by TDAM (i) are free from any influence by an entity related to TDAM and without taking into account any consideration relevant to an entity related to TDAM; (ii) represent the business judgment of TDAM uninfluenced by considerations other than the best interests of the Fund; (iii) comply with the applicable policies and procedures of TDAM; and (iv) achieve a fair and reasonable result for the Fund.

Brokerage Arrangements (000s):

From time to time, the Fund may enter into portfolio securities transactions with Related Dealers who may earn commissions or spreads provided that such trades are made on terms and conditions that are comparable to non-affiliated brokerages. During the Reporting Period, the Fund paid commissions to related parties amounting to \$5 or 0.4% of total commissions paid by the Fund for portfolio transactions in total.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the past five fiscal years, as applicable. For series that commenced operations during any of the periods presented, the data reported for that period represents results from the commencement of operations (as disclosed in the Past Performance section) to the end of that reporting period.

¹ This information is derived from the Fund's audited annual financial statements prepared in accordance with International Financial Reporting Standards. The Fund measures fair value of its investments based on close market prices, where the close market price falls within the bid-ask spread or based on quotations from recognized dealers. As such, the Fund's accounting policies for measuring the fair value of investments in the financial statements are substantively consistent with those used in measuring the net asset value ("NAV") for transactions with unitholders.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial periods. These tables are not intended to be a reconciliation of the net assets per unit.

³ Distributions were paid in cash or reinvested in additional units of the Fund, or both.

Net Asset Value per Unit (\$)	11.28	10.00	9.43	11.05	10.24

¹ This information is provided as at December 31 of the past five fiscal years, as applicable.

² Management Expense Ratio ("MER") is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) net of any waivers or absorptions for the stated period, including the Fund's proportionate share of the MER, if any, of the underlying fund(s) in which the Fund has invested in, and is expressed as an annualized percentage of daily average NAV during the period. Management Expense Ratio Before Waivers or Absorptions is based on total expenses and excludes the management fees on the portion of the NAV the Fund invests in the underlying funds that are managed by TDAM or its affiliates. There will be no duplication of management fees paid to TDAM or its affiliates. Any waivers or absorptions may be discontinued at any time by TDAM at its discretion without notice.

³ The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the stated period. Where a Fund invests in units of any underlying fund, the TER presented for the Fund includes the portion of TERs, if available, of the underlying fund(s) attributable to this investment.

⁴ The Fund's portfolio turnover rate ("PTR") indicates how actively the Fund's portfolio adviser manages its investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the stated period. The higher a fund's PTR, the greater the trading costs payable, directly or indirectly, by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the fiscal year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

As manager and trustee of the Fund, TDAM is responsible for the overall business and affairs of the Fund, including activities related to making units of the Fund available to investors, and providing, or arranging for the provision of, investment advisory services and marketing services to the Fund. In consideration for the provision of such services, each series of the Fund pays TDAM a management fee.

Management fees are calculated and accrued on a daily basis for each applicable series based on the net asset value of that series and paid monthly to TDAM.

The simplified prospectus discloses a specified annual management fee rate that TDAM can charge for each series of the Fund. Where TDAM chooses to charge a management fee rate below the specified annual management fee rate, the difference represents a waiver of management fees. TDAM may waive all or a portion of the management fees being charged to the Fund, which may be discontinued at any time by TDAM at its discretion without notice to unitholders.

The annual management fees and a breakdown of the major services rendered for each series, as a percentage of the management fees paid, are as follows:

(expressed as a %)	Annual Mgmt. Fees*	Dealer Compensation	Waived Operating Expenses	Other†
Investor Series	1.85	54.29	0.01	45.70
Premium Series	1.75†	57.32	0.01	42.67
Advisor Series	1.85	53.31	0.01	46.68
F-Series	0.85	0.00	0.02	99.98
H8 Series	1.85	54.29	0.01	45.70
FT5 Series	0.85	0.00	0.02	99.98
FT8 Series	0.85	0.00	0.02	99.98
T8 Series	1.85	52.67	0.01	47.32
D-Series	0.75	0.00	0.02	99.98

* Includes management fees paid by the Fund and the proportionate management fees, if any, of the underlying fund(s) managed by TDAM held by the Fund. However, no management fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the underlying fund(s) for the same services.

† The management fee rate disclosed represents the maximum annual rate per the simplified prospectus dated July 28, 2016. The series is no longer being offered under the most recent simplified prospectus.

‡ Investment advisory, trustee, marketing services and other.

Past Performance

The following charts show how the Fund has performed in the past, and can help you understand the risks of investing in the Fund. These returns include the reinvestment of all distributions. They do not include deduction of sales, switch, redemption, or other optional charges (which dealers may charge) or income taxes payable, and these returns would be lower if they did. The Fund's past performance does not necessarily indicate how it will perform in the future.

Year-by-year returns

The bar charts show how the Fund's performance has varied from year to year for each of the years shown. They show in percentage terms how an investment made on January 1 would have increased or decreased by December 31.

* From August 16, 2018 (commencement of operations) to December 31, 2018

* From February 10, 2015 (commencement of operations) to December 31, 2015

Annual Compound Returns

The following table shows the annual compound total returns for each series of units of the Fund for each of the periods indicated ended on December 31, 2024, compared with the following benchmarks:

- The Product Benchmark is comprised of:
 - 50% Bloomberg Multiverse Total Return Index (C\$) – This index covers the broad global fixed income market, including investment-grade and high-yield securities in all eligible currencies; and
 - 50% MSCI World High Dividend Yield Index (Net Dividend, C\$) – This index includes stocks of companies in all the developed markets around the world, which offer a higher than average dividend yield relative to a broad market index, net of withholding taxes.
- General Market Index 1:
 - Bloomberg Multiverse Total Return Index (C\$).
- General Market Index 2:
 - MSCI World Index (Net Dividend, C\$) – This index includes stocks of companies in all the developed markets around the world, net of withholding taxes.

(expressed as a %)	Past year	Past 3 years	Past 5 years	Past 10 years	Since inception

Caution regarding forward-looking statements

Certain portions of this report, including, but not limited to, “Results of Operations” and “Recent Developments”, may contain forward-looking statements including, but not limited to, statements about the Fund, its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable. Accordingly, assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and relevant market factors in North America and internationally, interest and foreign exchange rates, equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events.

The above mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing any undue reliance on forward-looking statements. Further, there is no specific intention of updating any forward-looking statements contained herein whether as a result of new information, future events or otherwise.
