## At a glance

**Independent Credit Research:** The TD Target Maturity Bond ETFs benefit from TD Asset Management Inc.'s (TDAM) proprietary credit research capabilities, security selection and in-depth analysis

**Flexibility:** Combining the benefits of traditional bond investing with the flexibility of an Exchange-Traded Fund

**Diversification:** Holding a basket of bonds from different issuers and sectors can provide investors with enhanced diversification, which potentially contributes to the overall fixed income portfolio resilience

## Investment Objectives

**TD Target Maturity Bond ETFs** seek to provide regular income and preserve capital by investing primarily in a portfolio of investment-grade corporate bonds, with the TD Target Maturity Canadian Bond ETFs focusing on investment-grade Canadian corporate bonds denominated in Canadian dollars, and the TD Target Maturity U.S. Bond ETFs on investment-grade U.S. corporate bonds denominated in U.S. dollars. Each TD Target Maturity Bond ETF matures in the target year specified in its name.

## Why Invest:

- A simple and efficient way to manage cash flows with the potential to earn an attractive yield from a diversified portfolio of investment-grade bonds
- Aligning maturity dates with cash needs provides a streamlined way to help meet financial goals
- Convenient and cost-effective solution to help build better bond ladders

Designed for investors saving for a financial goal in the target year.

# Key Features

TD Target Maturity Bond ETFs offer investors:

## Diversification

Diversification through allocation to a basket of bonds from different issuers and sectors, which potentially contributes to a more resilient fixed-income portfolio

## Independent Credit Analysis

TDAM's experienced credit research team performs deep credit analysis with the goal to uncover value and identify opportunities to help enhance portfolio yield while managing risk in the evolving fixed-income market

## Flexibility

Investors have the ability to buy or sell the ETFs during regular market hours

## Active Professional Management

The solution's active management allows the portfolio management team to respond to market events, seek out strategic opportunities, and provides more flexibility to potentially offer a higher yield to maturity while managing reinvestment risk in the final year of the investment

# Investment Strategy

The portfolio adviser seeks to achieve the investment objectives of the TD Target Maturity Bond ETFs by investing primarily in a portfolio of investment-grade corporate bonds, with the TD Target Maturity Canadian Bond ETFs focusing on investment-grade Canadian corporate bonds denominated in Canadian dollars and the TD Target Maturity U.S. Bond ETFs focusing on investment-grade U.S. corporate bonds denominated in U.S. dollars.

As target maturity funds, each TD Target Maturity Bond ETF has a pre-determined, specified lifespan. It is therefore anticipated that outside of the exception noted below, bonds held by a TD Target Maturity Bond ETF will mature in the same year the TD Target Maturity Bond ETF is expected to terminate. The portfolio manager will use its proprietary fundamental credit research and quantitative screens to seek to select securities that provide a high level of interest income and will attempt to minimize reinvestment risk in the year of termination of the TD Target Maturity Bond ETF.

Bonds selected at the outset will generally be held until maturity. Bonds must be rated investment grade at the time of purchase.

Investment-grade bonds issued by financial institutions with a maturity date beyond the year of termination of a TD Target Maturity Bond ETF may be included in its portfolio, provided such bonds are callable in the year the TD Target Maturity Bond ETF terminates.

In the year a TD Target Maturity Bond ETF terminates, cash generated from maturing bonds held may be reinvested in additional investment-grade corporate bonds that mature in the maturity year of the TD Target Maturity Bond ETF, or in cash and cash equivalents.

# Your Financial Goal Could Be a Bond ETF Away

TD Target Maturity Bond ETFs combine the benefits of popular fixed income investment options to build a simple, flexible, tax-efficient and low-cost solution to help investors meet their financial goals.

Quick Comparison	TD Target Maturity Bond ETFs	Individual Bonds	GICs	Traditional Bond Funds

Professional Management	✓	✗	✗	✓

TD Target Maturity Bond ETFs combine the benefits of traditional bond funds (such as diversification, professional management, ease of execution and regular income) with the characteristics of an individual bond (including defined maturity and reduction of duration risk over time), allowing investors to align their fixed income investment with specific financial goals or liabilities. This time horizon matching provides investors a path for potentially meeting their financial goals.

<sup>1</sup> Bonds trade over the counter and inventory may be limited.

<sup>2</sup> Most corporate bonds pay coupons on a semi-annual basis.
