Investor Presentation – Fixed Income**

Q4 2014

Caution regarding forward-looking statements

From time to time, the Bank makes written and/or oral forward-looking statements, including in this document, in other filings with Canadian regulators or the U.S. Securities and Exchange Commission, and in other communications. In addition, representatives of the Bank may make forward-looking statements orally to analysts, investors, the media and others. All such statements are made pursuant to the “safe harbour” provisions of, and are intended to be forward-looking statements under, applicable Canadian and U.S. securities legislation, including the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, statements made in this document, including in the Management’s Discussion and Analysis (“2014 MD&A”) under the heading “Economic Summary and Outlook”, for each business segment under headings “Business Outlook and Focus for 2015”, and in other statements regarding the Bank’s objectives and priorities for 2015 and beyond and strategies to achieve them, and the Bank’s anticipated financial performance. Forward-looking statements are typically identified by words such as “will”, “should”, “believe”, “expect”, “anticipate”, “intend”, “estimate”, “plan”, “may”, and “could”.

By their very nature, these forward-looking statements require the Bank to make assumptions and are subject to inherent risks and uncertainties, general and specific. Especially in light of the uncertainty related to the physical, financial, economic, political, and regulatory environments, such risks and uncertainties – many of which are beyond the Bank’s control and the effects of which can be difficult to predict – may cause actual results to differ materially from the expectations expressed in the forward-looking statements. Risk factors that could cause such differences include: credit, market (including equity, commodity, foreign exchange, and interest rate), liquidity, operational (including technology), reputational, insurance, strategic, regulatory, legal, environmental, capital adequacy, and other risks. Examples of such risk factors include the general business and economic conditions in the regions in which the Bank operates; the ability of the Bank to execute on key priorities, including to successfully complete acquisitions and strategic plans and to attract, develop and retain key executives; disruptions in or attacks (including cyber attacks) on the Bank’s information technology, internet, network access or other voice or data communications systems or services; the evolution of various types of fraud or other criminal behaviour to which the Bank is exposed; the failure of third parties to comply with their obligations to the Bank or its affiliates, including relating to the care and control of information; the impact of new and changes to current laws and regulations; the overall difficult litigation environment, including in the U.S.; increased competition, including through internet and mobile banking; changes to the Bank’s credit ratings; changes in currency and interest rates; increased funding costs for credit due to market illiquidity and competition for funding; changes to accounting policies and methods used by the Bank; and the occurrence of natural and unnatural catastrophic events and claims resulting from such events. The Bank cautions that the preceding list is not exhaustive of all possible risk factors and other factors could also adversely affect the Bank’s results. For more detailed information, please see the “Risk Factors and Management” section of the 2014 MD&A, as may be updated in subsequently filed quarterly reports to shareholders and news releases (as applicable) related to any transactions discussed under the heading “Significant Events” in the relevant MD&A, which applicable releases may be found on www.td.com. All such factors should be considered carefully, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements, when making decisions with respect to the Bank and the Bank cautions readers not to place undue reliance on the Bank’s forward-looking statements.

Material economic assumptions underlying the forward-looking statements contained in this document are set out in the 2014 MD&A under the headings “Economic Summary and Outlook”, and for each business segment, “Business Outlook and Focus for 2015”, each as updated in subsequently filed quarterly reports to shareholders.

Any forward-looking statements contained in this document represent the views of management only as of the date hereof and are presented for the purpose of assisting the Bank’s shareholders and analysts in understanding the Bank’s financial position, objectives and priorities and anticipated financial performance as at and for the periods ended on the dates presented, and may not be appropriate for other purposes. The Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by or on its behalf, except as required under applicable securities legislation.

2. For long term debt (deposits) of The Toronto-Dominion Bank, as at October 31, 2014. Credit ratings are not recommendations to purchase, sell, or hold a financial obligation inasmuch as they do not comment on market price or suitability for a particular investor. Ratings are subject to revision or withdrawal at any time by the rating organization.

3. Effective November 1, 2011, the Bank prepares its consolidated financial statements in accordance with International Financial Reporting Standards (IFRS), the current generally accepted accounting principles (GAAP), and refers to results prepared in accordance with IFRS as the "reported" results. The Bank also utilizes non-GAAP financial measures to arrive at "adjusted" results (i.e. reported results excluding "items of note", net of income taxes) to assess each of its businesses and measure overall Bank performance. Please see "How the Bank Reports" starting on page 5 of the Q4 2014 Earnings News Release for further explanation and a reconciliation of the Bank's non-GAAP measures to reported basis results.

4. Retail includes Canadian Retail and U.S. Retail segments. See slide 8 for more detail.

5. Return on risk-weighted assets (RWA) is calculated as adjusted net income available to common shareholders divided by average RWA. See footnote 3 above for definition of adjusted results.

1. Current LTV is the combination of each individual mortgage LTV weighted by the mortgage balance

2012 Measures Announced by Minister Flaherty (Government of Canada)

- Maximum amortization period lowered from 30 years to 25 years
- Maximum amount that Canadians can borrow when refinancing lowered to 80% from 85%
- Maximum GDS¹ and TDS² ratios of 39% and 44% respectively
- Insured mortgages only available on homes with a purchase price of less than \$1 million
- Rules only apply to high ratio mortgages (mortgages requiring government insurance)
- Took effect on July 9, 2012 avoiding a rush to beat the new rule (as seen in 2011)

2012 Highlights of Guideline B-20 (OSFI)

- Maximum loan-to-value of 65% for a HELOC (from 80%)
- HELOCs will not amortize, but lenders must expect an ability to fully repay over time
- Qualifying rate for conventional mortgages with variable rates or fixed rate terms less than 5 years will be “the greater of the contractual mortgage rate or the five-year benchmark rate published by the Bank of Canada”
- LTV to be re-calculated upon refinancing and whenever the lender deems prudent
- Federally regulated lenders have until “no later than fiscal year-end 2012” to comply

1. “GDS” is Gross Debt Service ratio, which is the percentage of a borrower’s income that is required to service housing-related costs (i.e., mortgage payments, taxes, heating costs, and 50% of condominium fees, if applicable).

2. “TDS” is Total Debt Service ratio, which is the percentage of a borrower’s income that is required to service all debt obligations (i.e., including housing costs, loans, lines of credit, car payments, and credit card bills).

- Economic momentum is building in the United States
 - The economy generated more jobs over the first eight months of the year than any period since 1999
 - Consumer spending will be buoyed by job and income growth
 - Residential real estate will make a positive contribution to growth in 2014-15
 - Low interest rates and rising confidence will support business investment

- Canadian economy closely linked to U.S. fortunes – firming in U.S. private demand helps Canada's prospects
 - Domestic demand will be restrained by high household debt burdens, and cooling housing market

- Treasury paradigm
 - Contribute to stable and growing earnings
 - Manage non-trading market risk within established limits
- Match terms of assets and liabilities
 - Do not engage in liquidity carry trade
 - Match underlying funding maturities to term of assets or stressed trading market depth
- Disciplined transfer pricing process
 - Credit deposit products for liquidity provided and charge lending products for liquidity consumed
- Global liquidity risk management framework
 - Hold sufficient liquid assets to meet a “Severe Combined Stress” scenario for a minimum 90-day period
 - Each liquidity management unit has its own policy and contingent funding plan consistent with the enterprise LRM framework
 - Monitor global funding market conditions and potential impacts to funding access
 - Well-positioned for 100% LCR compliance for January 2015

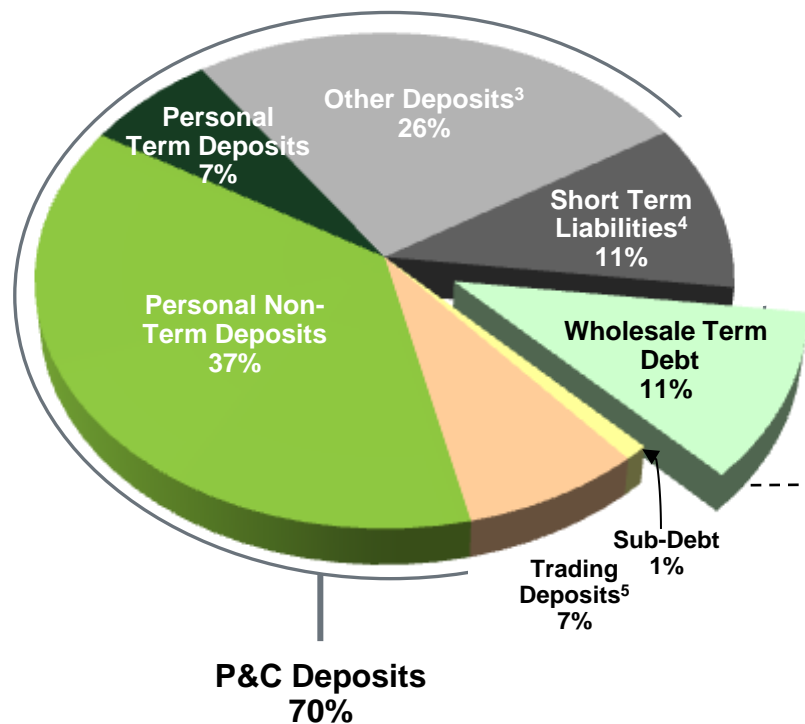

Conservative liquidity policies

- Large base of stable retail and commercial deposits
 - Customer service business model delivers growing base of “sticky” and franchise-based deposits
 - Reserve assets held for deposit balance that is not considered permanent
- User of securitization programs via Canada Mortgage Bond (CMB) and regular National Housing Act (NHA) MBS issues
 - MBS funding matches underlying asset maturity while offering attractive risk adjusted yield to investor
 - MBS cap (\$80B for 2014) has limited NHA MBS issuances
- Other secured funding sources
 - Legislative Covered Bonds and asset-backed securitization further expands TD's investor base
 - C\$1.0 billion of Genesis II Class A notes in May 2014

Canadian Covered Bond Legislation

- The Covered Bond legal framework was announced in the 2012 Federal Budget through amendment to the National Housing Act and was passed into law in June 2012
- Issuance must be in accordance with the legislation and issuers are prohibited from using insured mortgage assets in programs
- US\$10B of Covered Bonds issued under current program, which comprised of insured assets, hence can no longer be used
- Canada Mortgage and Housing Corporation was charged with the administration of covered bonds in Canada
- Legal framework provides statutory protection with respect to the cover pool for the covered bond investor
- Explicit guidelines on governance and third-party roles provide certainty of cover pool value and administration
- The legislation takes into account international best standards, establishing a high level of safeguards and detailed disclosure requirements for investors and regulators

Legislation provides certainty

■ Asset Coverage Test

- ❑ To confirm overcollateralization of the covered bond collateral held against covered bonds outstanding
- ❑ Indexation requirement (July 1, 2014) provides adjustment for market development
- ❑ Value to be adjusted at least quarterly

■ Valuation Calculation

- ❑ Test to monitor a covered bond program's exposure to interest and currency rates, measuring the PV of covered bond collateral to covered bonds outstanding

■ Asset Percentage

- ❑ Guide does not impose specified minimum or maximum level
- ❑ However, it requires issuers to fix a minimum and maximum over collateralization level to give investors confidence that OC levels will be maintained over the life of the program

■ Required Ratings and Rating Triggers

- ❑ Minimum two program ratings required
- ❑ Mandatory triggers needed to determine an Issuer's obligations to replace the account bank and swap counterparty as well as to collateralize contingent swaps on a mark to market basis
- ❑ Rating requirements in legislation unique to Canada

- Strong capital base – well positioned for Basel III
- Industry leading credit ratings
- Proactive & disciplined risk management
- Attractive balance sheet composition
- Diverse funding strategy

World Real GDP Growth¹

Y/Y % Change

North American Real GDP Growth²

(%)

- Global economic growth will remain modest with a mild acceleration expected over the next two years
- Faster U.S. growth, coupled with sluggish economic activity in Japan and Europe, and a slowdown in China, points to a divergence in performance among major economies
- U.S. growth to outpace Canada on average over the next few years

Consumers Rebounding on Faster Income Growth¹

- Supported by strengthening job growth and falling energy prices, consumer spending growth will accelerate in 2014 and 2015.

Housing Market Moving Gradually Higher¹

U.S. Real GDP Growth Y/Y % Change

- Ongoing job growth will support the housing market by raising demand from first-time homebuyers.

U.S. Economy – Mostly Good News

Interest Rates, Canada and U.S.¹

- Modest outlook and low inflation mean North American central banks are set to leave monetary policy at exceptionally accommodative levels
- Interest rate increases will be gradual and rates are likely to remain well below historical averages

See also pages 198-203 of the 2013 Annual Report for a reconciliation for 10 years ending FY13. For the purpose of calculating contribution by each business segment, adjusted earnings from the Corporate segment are excluded.

2. Effective July 4, 2011, executive responsibilities for TD Insurance were moved from Group Head Canadian P&C Segment to Group Head Wealth Segment. Results are updated for segment reporting purposes effective Q1 2012. These changes were applied retroactively to 2011 for comparative purposes.

3. As a result of the Bank's transition to IFRS as described above, the calculation of the Compounded Annual Growth Rate (CAGR) includes balances based on Canadian GAAP for 2010 and balances based on IFRS from 2011 to 2014.

4. Effective Q1 2014, retail segments were realigned into Canadian Retail and U.S. Retail. For details of the retail segments, see slide 8. The segment realignment along with implementation of new IFRS standard and amendments, and impact of the stock dividend announced on December 5, 2013 were applied retroactively to 2012 and 2013 results.
