For the 2nd Quarter ended April 30, 2009

The supplemental information contained in this package is designed to improve the readers' understanding of the financial performance of TD Bank Financial Group (the Bank). This information should be used in conjunction with the Bank's Q2 2009 Report to Shareholders and Investor Presentation, as well as the 2008 audited Consolidated Financial Statements for the year ended October 31, 2008.

How the Bank Reports

The Bank prepares its consolidated financial statements in accordance with Canadian generally accepted accounting principles (GAAP) and refers to results prepared in accordance with GAAP as the "reported" results. The Bank also utilizes non-GAAP financial measures referred to as "adjusted" results to assess each of its businesses and to measure overall Bank performance. To arrive at adjusted results, the Bank removes "items of note", net of income taxes, from reported results. The items of note relate to items which management does not believe are indicative of underlying business performance. The items of note are listed on page 3 of this package. The Bank believes that adjusted results provide the reader with a better understanding of how management views the Bank's performance.

As explained, adjusted results are different from reported results determined in accordance with GAAP. Adjusted results, items of note and related terms are non-GAAP financial measures as these are not defined terms under GAAP and, therefore, may not be comparable to similar terms used by other issuers. A reconciliation between the Bank's reported and adjusted results is provided on page 6 of the Bank's Q2 2009 Report to Shareholders.

Segmented Information

For management reporting purposes, the Bank's operations and activities are organized around four key business segments operating in a number of locations in key financial centres around the globe: Canadian Personal and Commercial Banking, including TD Canada Trust and TD Insurance; Wealth Management, including TD Waterhouse and an investment in TD Ameritrade; U.S. Personal and Commercial Banking through TD Banknorth Inc. (TD Banknorth) and TD Bank, America's Most Convenient Bank; and Wholesale Banking, including TD Securities. The Bank's other activities are grouped into the Corporate segment. Effective the third quarter of 2008, U.S. insurance and credit card businesses were transferred to the Canadian Personal and Commercial Banking segment, and the U.S. Wealth Management businesses to the Wealth Management segment for management reporting purposes to align with how these businesses are now being managed on a North American basis. Prior periods have not been reclassified as the impact was not material.

The Bank measures and evaluates the performance of the segments based on our management structure and is not necessarily comparable with other financial services companies. Results of each business segment reflect revenue, expenses, assets and liabilities generated by the businesses in that segment. Due to the complexity of the Bank, its management reporting model uses various estimates, assumptions, allocations and risk-based methodologies for funds transfer pricing, inter-segment revenue, income tax rates, capital, indirect expenses and cost transfers to measure business segment results. Transfer pricing of funds is generally applied at market rates. Inter-segment revenue is negotiated between each business segment and approximates the value provided by the distributing segment. Income tax expense or benefit is generally applied to each segment based on a statutory tax rate and may be adjusted for items and activities unique to each segment.

The Bank measures and evaluates the performance of each segment based on adjusted results, economic profit and return on invested capital. Economic profit is adjusted net income, less a charge for average invested capital. Each segment's invested capital represents the capital required for economic risks, including credit, market and operational risks, plus the purchased amounts of goodwill and intangible assets, net of impairment write downs. Return on invested capital is adjusted net income, divided by average invested capital. Economic profit and return on invested capital are not defined terms under GAAP and, therefore, may not be comparable to similar terms used by other issuers. A reconciliation between the Bank's economic profit, return on invested capital and adjusted net income available to common shareholders is provided on page 7 of the Bank's Q2 2009 Report to Shareholders.

Amortization of intangible expense is included in the Corporate segment. Accordingly, net income for the operating business segments is presented before amortization of intangibles, as well as any other items of note not attributed to the operating segments. Net interest income within Wholesale Banking is calculated on a taxable equivalent basis (TEB), which means that the value of the non-taxable or tax-exempt income, including dividends, is adjusted to its equivalent before-tax value. Using TEB allows the Bank to measure income from all securities and loans consistently and makes for a more meaningful comparison of net interest income with similar institutions. The TEB increase to net interest income and provision for income taxes reflected in the Wholesale Banking segment results is reversed in the Corporate segment.

As stated in the 2008 audited Consolidated Financial Statements, the Bank securitizes retail loans and receivables held by the Canadian Personal and Commercial Banking segment in transactions that are accounted for as sales. For the purpose of segmented reporting, Canadian Personal and Commercial Banking accounts for the transactions as though they are financing arrangements. Accordingly, the interest income earned on the assets sold net of the funding costs incurred by the purchaser trusts is recorded in net interest income and the provision for credit losses related to these assets is charged to provision for (reversal of) credit losses. This accounting is reversed in the Corporate segment and the gain recognized on sale which is in compliance with appropriate accounting standards together with income earned on the retained interests net of credit losses incurred are included in other income.

For more information, see the "Business Focus" section of the 2008 MD&A and Note 30 to the 2008 audited Consolidated Financial Statements.

[1] As explained in footnote 2 on page 7, due to alignment of reporting period of U.S. entities, the amounts relating to TD Banknorth and Commerce for the month of January 2009 have been reflected in retained earnings.

[2] Earnings per share (EPS) is computed by dividing net income available to common shareholders by the weighted average number of shares outstanding during the period. As a result, the sum of the quarterly EPS figures may not equal the year-to-date EPS.

[3] Includes unrealized gains (losses) on publicly traded available-for-sale securities which are included in other comprehensive income.

[4] Effective November 1, 2007, the Bank implemented guidelines of the Office of the Superintendent of Financial Institutions Canada (OSFI) based on the "International Convergence of Capital Measurement and Capital Standards - A Revised Framework" (Basel II), issued by the Basel Committee on Banking Supervision. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I Capital Accord (Basel I).

[5] Effective Q2 2009, for both accounting and regulatory reporting purposes, the one month lag in reporting of TD Banknorth and Commerce financial position and results is eliminated by using the same period end as the rest of the Bank. Previously, for Q4 2008 and Q1 2009, TD Banknorth and Commerce assets as at the Bank's period end were used when calculating the Bank's regulatory capital position. Further, effective Q4 2008, for regulatory purposes only, the Bank's investment in TD Ameritrade is translated using the period end foreign exchange rate of the Bank.

[1] Economic profit is adjusted net income available to common shareholders less a charge for average invested capital. The rate charged for invested capital is 10.0% in 2009, 9.3% in 2008 and 9.4% in 2007.

[2] Invested capital is common shareholders' equity plus the cumulative after-tax amount of purchased intangible assets amortized as of the reporting date.

[3] Adjusted return on common equity is adjusted net income available to common shareholders divided by average common equity.

[4] Return on invested capital is adjusted net income available to common shareholders divided by average invested capital.

[5] Return on risk-weighted assets is adjusted net income available to common shareholders divided by average RWA.

[6] Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the average RWA, on which the return is based, after Q4 2007 is calculated based on Basel II, while all prior period returns are calculated based on Basel I.

[7] Closing common share price divided by diluted earnings per share for trailing 4 quarters.

[8] Total shareholder return includes the year-over-year change in share price and assumes that dividends received were invested in additional common shares.

[9] Dividends per common share for trailing 4 quarters divided by average of high and low common share prices for the period.

[10] The calculations for common dividend payout ratio for Q2 2008 and the full year 2008 took into account the shares issued on the acquisition of Commerce and the dividend paid on those shares. Excluding those shares and the dividend on those shares, the common dividend payout ratio would have been 50.4% reported and 44.1% adjusted for Q2 2008 and 47.7% reported and 48.0% adjusted for the full year 2008.

Adjustment for Items of Note, net of income taxes[1]

[1] Effective Q3 2008, the U.S. insurance and credit card businesses are included in the Canadian Personal and Commercial Banking segment, net of distribution commissions to the U.S. Personal and Commercial Banking segment. Prior periods have not been reclassified as the impact was not material to segment results.

[2] The rate charged for invested capital is 9.0% in 2009, 8.5% in 2008 and 2007.

[3] Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.

[4] For management reporting purposes, average loans for multi-unit residences (MURs) comprising of five or more units have been reclassified from total average loans – personal to average loans and acceptances – business, starting with Q1 2008. The impact was $6 billion for each of the quarters Q1 2008 to Q3 2008, and $5 billion for Q4 2008 and Q1 2009.

Canadian Personal and Commercial Banking comprises our Canadian Banking and Global Insurance businesses. Under the TD Canada Trust brand, the retail operations provide a full range of financial products and services to approximately 11 million personal and small business customers. As a leading customer services provider, TD Canada Trust offers anywhere, anytime banking solutions through telephone and internet banking, more than 2,672 automated banking machines and a network of 1,108 branches located across Canada. TD Commercial Banking serves the needs of medium-sized Canadian businesses, customizing a broad range of products and services to meet their financing, investment, cash management, international trade and day-to-day banking needs. Under the TD Insurance brand, the Bank offers a broad range of insurance products, including home and automobile coverage, life and health insurance in Canada and U.S., as well as business property and casualty business in the U.S., in addition to credit protection coverage on TD Canada Trust lending products.

[1] Effective Q3 2008, the U.S. Wealth Management businesses are included in the Wealth Management segment, net of distribution commissions to the U.S. Personal and Commercial Banking segment. Prior periods have not been reclassified as the impact was not material to segment results.

[2] The equity in net income of an associated company includes net impact of internal management adjustments which are reclassified to other reporting lines in the Corporate segment.

[3] The rates charged for invested capital for North American and international businesses are, respectively, 10.0% and 13.0% in 2009; 9.5% and 12.0% in 2008; and 9.5% and 12.0% in 2007. The rate charge for invested capital for the TD Ameritrade business line is 12.0% in 2009, 11.0% in 2008 and 11.0% in 2007.

[4] Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.

[5] Effective Q3 2008, the number of retail brokerage offices include U.S. offices as a result of transfer of U.S. Wealth Management businesses to the Wealth Management segment.

Wealth Management provides a wealth of experience through a wide array of investment products and services to a large and diverse retail and institutional global client base. Wealth Management is one of the largest in Canada, based on market share of assets, and comprises a number of advisory, distribution and asset management businesses, including TD Waterhouse, TD Mutual Funds and TD Asset Management Inc. (TDAM). In Canada, online brokerage, financial planning, private investment advice and private client services cater to the needs of different retail customer segments through all stages of their investing life cycle. U.S. Wealth Management also provides a wide range of financial advisory, private banking, trust and investment management services to U.S. clients. Through Wealth Management's online brokerage channels, it serves customers in Canada, the United Kingdom and the U.S. (through TD Ameritrade). Online Brokerage has industry leadership in both price and service.

1 On January 1, 2007, TD Banknorth completed the acquisition of Interchange Financial Services Corporation (Interchange). On April 20, 2007, the Bank completed the privatization of TD Banknorth. Effective Q3 2007, results of TD Bank USA, N.A. (TD Bank USA), previously reported in the Corporate segment, are included in the U.S. Personal and Commercial Banking segment (U.S. P&C) prospectively. On March 31, 2008, the Bank completed the acquisition of Commerce. Effective Q3 2008, the U.S. insurance and credit card businesses were included in the Canadian Personal and Commercial Banking segment, and the U.S. Wealth Management businesses were included in the Wealth Management segment, net of distribution commissions to U.S. P&C; Prior periods were not reclassified as the impact was not material to segment results.

2 Effective Q2 2009, the financial position and results of operations of TD Banknorth and Commerce are reflected in U.S. P&C using the same period as the Bank and the one month lag in reporting is eliminated. Accordingly, the results of TD Banknorth and Commerce for January 2009 have been included directly in retained earnings. Previously, these results were included on a one month lag, except that reported non-interest expenses for Q2 2007 and Q2 2008 included restructuring charges incurred in April 2007, and restructuring and integration charges incurred in April 2008, respectively.

3 Items of note relate primarily to restructuring and integration charges recorded in connection with mergers and acquisitions. See footnotes 5 and 6 on page 44.

4 The rate charged for invested capital is 9.5% in 2009, 9.0% in 2008 and 9.0% in 2007.

5 This represents RWA as at the end of the Bank's fiscal period.

6 Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.

7 For regulatory purposes only, effective October 31, 2008, the one month lag in reporting TD Banknorth and Commerce assets was eliminated by using the same period end as the rest of the Bank. Prior to October 31, 2008, the Bank's regulatory capital was calculated incorporating TD Banknorth and Commerce on a one month lag.

8 Average deposits and margin on average earning assets exclude the impact related to the money market deposit account (MMDA) agreement with TD Ameritrade. The MMDA is described in Note 30 of our 2008 audited Consolidated Financial Statements.

9 For calculating margin on average earning assets, TEB is included. The impact of TEB is not material. However, no TEB is included in the separate disclosure for revenue (line 3) and income taxes (line 7).

10 Includes full service retail banking stores.

U.S. Personal and Commercial Banking (U.S. P&C) comprises the Bank's U.S.-based retail and commercial banking operations. Distribution commissions are paid to U.S. P&C for U.S. activities reported in the Canadian Personal and Commercial Banking and Wealth Management segments. The Bank's operations provide a full range of financial products and services through multiple delivery channels, including a network of over 1,000 branches located primarily in the Northeast and Mid-Atlantic regions of the U.S. and Florida, telephone and internet banking and automated banking machines, allowing customers to have banking access virtually anywhere and anytime. U.S. P&C also serves the needs of businesses, customizing a broad range of products and services to meet their financing, investment, cash management, international trade and day-to-day banking needs.

1 On January 1, 2007, TD Banknorth completed the acquisition of Interchange. On April 20, 2007, the Bank completed the privatization of TD Banknorth. Effective Q3 2007, results of TD Bank USA previously reported in the Corporate segment, are included in the U.S. P&C prospectively. On March 31, 2008, the Bank completed the acquisition of Commerce. Effective Q3 2008, the U.S. insurance and credit card businesses were included in the Canadian Personal and Commercial Banking segment, and the U.S. Wealth Management businesses were included in the Wealth Management segment, net of distribution commissions to U.S. P&C; Prior periods were not reclassified as the impact was not material to segment results.

2 Effective Q2 2009, the financial position and results of operations of TD Banknorth and Commerce are reflected in U.S. P&C using the same period as the Bank and the one month lag in reporting is eliminated. Accordingly, the results of TD Banknorth and Commerce for January 2009 have been included directly in retained earnings. Previously, these results were included on a one month lag, except that reported non-interest expenses for Q2 2007 and Q2 2008 included restructuring charges incurred in April 2007, and restructuring and integration charges incurred in April 2008, respectively. U.S. dollar amounts shown are the corresponding Canadian dollar amounts included in the Bank's reports to shareholders for the relevant periods divided by the average foreign exchange rate.

3 Items of note relate primarily to restructuring and integration charges recorded in connection with mergers and acquisitions. See footnotes 5 and 6 on page 44.

4 The rate charged for invested capital is 9.5% in 2009, 9.0% in 2008 and 9.0% in 2007.

5 This represents RWA as at the end of the Bank's fiscal period.

6 Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.

7 For regulatory purposes only, effective October 31, 2008, the one month lag in reporting TD Banknorth and Commerce assets was eliminated by using the same period end as the rest of the Bank. Prior to October 31, 2008, the Bank's regulatory capital was calculated incorporating TD Banknorth and Commerce on a one month lag.

8 Average deposits exclude the impact related to the MMDA agreement with TD Ameritrade, described in Note 30 of our 2008 audited Consolidated Financial Statements.

U.S. Personal and Commercial Banking (U.S. P&C) comprises the Bank's U.S.-based retail and commercial banking operations. Distribution commissions are paid to U.S. P&C for U.S. activities reported in the Canadian Personal and Commercial Banking and Wealth Management segments. The Bank's operations provide a full range of financial products and services through multiple delivery channels, including a network of over 1,000 branches located primarily in the Northeast and Mid-Atlantic regions of the U.S. and Florida, telephone and internet banking and automated banking machines, allowing customers to have banking access virtually anywhere and anytime. U.S. P&C also serves the needs of businesses, customizing a broad range of products and services to meet their financing, investment, cash management, international trade and day-to-day banking needs.

[1] Provision for credit losses includes the cost of credit protection incurred in hedging the lending portfolio.

[2] The rate charged for invested capital in 2009 is 13.0%. Prior to 2009, the rates were 11.5%.

[3] Effective November 1, 2007, the Bank implemented OSFI's guidelines based on Basel II. Accordingly, the numbers after Q4 2007 are based on Basel II, while all prior period numbers are based on Basel I.

[4] Defined as gross loans and bankers' acceptances, excluding letters of credit and before any cash collateral, credit default swap, reserves, etc.

[5] Includes trading-related income reported in net interest income (line 1) and other income (line 2).

Wholesale Banking serves a diverse base of corporate, government and institutional clients in key financial markets around the world. Under the TD Securities brand, Wholesale Banking provides a wide range of capital markets and investment banking products and services that include: underwriting and distribution of new debt and equity issues, providing advice on strategic acquisitions and divestitures, and executing daily trading and investment needs.

[1] Commencing Q3 2007, the results of TD Bank USA (previously reported in the Corporate segment for the period Q2 2006 to Q2 2007) are included in the U.S. Personal and Commercial Banking segment prospectively.
[2] Includes the elimination of TEB adjustments reported in Wholesale Banking results.
[3] Operating segment results are presented excluding the impact of asset securitization programs, which are reclassified in the Corporate segment.
[4] Items of note are removed from reported results to compute the adjusted results.

The Corporate segment includes the effects of asset securitization programs in Canadian Personal and Commercial Banking, treasury management, general provisions for credit losses, the elimination of taxable equivalent adjustments, corporate level tax benefits, and residual unallocated revenues, expenses and taxes.

[1] Within the Bank's property and casualty insurance subsidiaries, investments that fund policy liabilities are designated as trading under the fair value option. Effective Q2 2008, mark-to-market income from interest rate swaps associated with certain investments funding policy liabilities is also reflected on line 10. For Q1 2008 and Q4 2007, this mark-to-market income amounting to $18 million and $(1) million, respectively, was reflected in net interest income. The swaps did not exist prior to Q4 2007. Due to the immaterial nature of the mark-to-market income in prior quarters, no retroactive reclassification was made.

[2] Included in Q2 2009 is $229 million of derivative losses which are substantial offsets to the income reported on line 9 above

[1] Effective Q1 2008, the Bank implemented OSFI's guidelines based on Basel II. Lines 1 to 7 represent disclosure under Basel II. Comparative numbers for unrealized gain (loss on total banking book equities are provided on line 8

[2] Unrealized gain (loss) on publicly traded available-for-sale securities (AFS) are included in other comprehensive income.

[3] Unrealized gain (loss) for privately held equities are neither recognized in the balance sheet through other comprehensive income nor through the income statement.

[4] Effective Q3 2008, the U.S. wealth management businesses are included in the Wealth Management segment, net of distribution commissions to the U.S. Personal and Commercial Banking segment. Prior periods have not been reclassified as the impact was not material to segment results.

[1] Based on geographic location of unit responsible for recording revenue.
[2] The presentation of Q4, 2008 has been retroactively reclassified to conform to the current presentation of reporting real estate secured loans under the borrower's appropriate industry sector rather than as a real estate loan. Additionally, in Q4 2008 and Q1 2009, certain automotive and industrial construction and trade contractors loans were reclassified to the financial sector.

[1] Including Small Business Banking.

[2] The quarter-over-quarter increase in Q1 2008 was largely a result of a change in the definition of gross impaired loans for insured residential mortgages from 360 days to 90 days past the contractual due date. There was an insignificant impact on specific allowances as a majority of the net increase in gross impaired balances related to residential mortgages that are insured.

[3] Q2 2008 included $97 million of impaired loans due to the Commerce acquisition. All loans acquired from Commerce have been measured at fair value. Fair value takes into consideration the credit quality of the loans and as a result, no allowance was recognized upon acquisition.

[4] Includes a small portion of personal and commercial loans booked in U.S. entities, but managed by the Canadian Personal and Commercial Banking segment.

[5] As explained in footnote 2 on page 7, due to alignment of reporting period of U.S. entities, the impact on gross impaired loans for January 2009 comprised of additions to impaired loans of $153 million; return to performing status, repaid or sold of $66 million; write-offs of $35 million; and foreign exchange and other adjustments of $5 million.

[6] Includes customers' liability under acceptances.

[1] As a result of alignment of reporting period of U.S. entities as explained in footnote 2 on page 7, the impact on specific allowance for credit losses for January 2009 comprised of write-offs of $35 million; provision for credit losses of $55 million; and foreign exchange and other adjustments of $2 million.

[2] As a result of alignment of reporting period of U.S. entities as explained in footnote 2 on page 7, the impact on general allowance for credit losses for January 2009 comprised of provision for credit losses of $25 million; and foreign exchange and other adjustments of $4 million.

[3] All loans acquired from Commerce have been measured at fair value. Fair value takes into consideration the credit quality of the loans and as a result, no allowance was recognized upon acquisition.

[4] Effective April 30, 2009, allowance for credit losses for off-balance sheet instruments is included in other liabilities. Prior period balances have not been reclassified.

[1] See footnote 2 on page 7.

[2] In October 2008, the Bank adopted Amendments to CICA Section 3855, *Financial Instruments – Recognition and Measurement* and Section 3862, *Financial Instruments – Disclosure* (the Amendments). The Amendments permit the reclassification of financial assets out of trading and available-for-sale categories in specified circumstances. During Q4 2008, the Bank changed its investment strategy with respect to certain trading debt securities. These debt securities were previously recorded at fair value with changes in fair value, as well as any gains or losses realized on disposal, recognized in trading income. Since the Bank no longer intends to actively trade in these debt securities, the Bank reclassified these debt securities into the available-for-sale category effective August 1, 2008 in accordance with the Amendments and recorded the changes in fair value in other comprehensive income. For details, see Notes 1 and 2 to the Bank's 2008 audited Consolidated Financial Statements.

[3] The Bank consolidated TD Bank, N.A. and reported the investment in TD Ameritrade using the foreign exchange rate as at September 30, 2008 as the results of these operations were included on a one month lag basis. If the October 31, 2008 foreign exchange rate had been used, there would have been an increase in the accumulated other comprehensive income of $3.347 billion, with a corresponding increase in the Bank's net assets.

[1] For exposures under the Standardized Approach, eligible financial collateral can include cash, gold, highly rated debt securities and equities listed on the main index.

[2] For exposures under the AIRB approach, eligible financial collateral is taken into account in the Bank's Loss Given Default (LGD) models. Separate disclosure of eligible financial collateral is, therefore, not required.

[1] Credit risk exposures are after credit risk mitigation and net of specific allowance. From Q2 2008 to Q4 2008, Commerce exposures are included and followed the Interim Approach to Reporting. Starting Q1 2009, Commerce exposures followed the Standardized approach.

[2] Under the Standardized approach, other retail includes qualifying revolving retail exposures.

[1] Retail Actual and Expected loss rates are measured as follows:
Actual loss rate represents the actual write-offs net of recoveries for the current and prior 3 quarters divided by the outstanding balances taken at the beginning of the 4-quarter period starting 15 months ago. This reflects the 3-month lag between the Basel II definition of default (at 90 days past due) and write-off (at 180 days).
Expected loss rate represents the loss rate that was predicted at the beginning of the 4-quarter period defined above. The expected loss is measured using Basel II parameters (PDxLGDxEAD) divided by outstanding balances at the beginning of the 4-quarter period.

[2] Non-retail Actual and Expected loss rates are measured as follows:
Actual loss rate represents the change in specific allowance plus write-offs less recoveries, divided by the outstanding balances for the same period, for each of the current and prior 3 quarters.
Expected loss rate represents the loss rate that was predicted at the beginning of the applicable 4-quarter period defined above. The expected loss is measured using Basel II parameters (PDxLGDxEAD) divided by outstanding balances at the beginning of the 4-quarter period.

[3] The Historical loss rate equals total actual losses for all years in the historically measured period divided by total outstanding balances for all years in the historically measured period. Currently, the Bank includes comparable data from fiscal 2002 through to the current year in the historically measured period. This historical data will be updated annually until a complete business cycle is included in the historically measured period. A business cycle is estimated to be 10-15 years in duration.

Commentary:

Differences between Actual loss rates and Expected loss rates are due to the following reasons:

- Expected losses are calculated using "through the cycle" risk parameters while actual losses are determined at a "point in time" and reflect economic conditions at that time. Using "through the cycle" parameters has the effect of stabilizing expected losses over a longer period of time. As a result, actual losses may exceed expected losses during a recession and may fall below expected losses during economic growth.
- Expected loss parameters are conservatively estimated (i.e. adjusted upwards) to account for the limited number of years of historical data available (i.e. not yet a full business cycle).
- LGD parameters used in the expected loss estimates are adjusted upwards to reflect potential economic downturn conditions.

To ensure our models and risk parameters continue to be reasonable predictors of potential loss, we assess and review our risk parameters against actual loss experience and public sources of information at least annually and we update our models as required.

Retail:

There was a material change in Actual loss rate for Retail exposures in the 4 quarters ending Q2 2009 vs. the 4 quarters ending Q1 2009 due to the impact of the recession, in particular higher unemployment and personal bankruptcy rates, while the "through-the-cycle" Expected Loss Rates have remained reasonably stable, as anticipated.

For Qualifying revolving retail and Other retail exposures, default rates and LGD were higher in the 4 quarters ending Q2 2009 than they were during the historically measured period, which was characterized by historically favourable economic conditions. As a result, Actual loss rate in the 4 quarters ending Q2 2009 was higher than the Historical actual loss rate.

Non-retail:

There has been an increase in the Actual loss rate for Non-retail exposures due to deteriorating credit conditions. Actual loss rate continues to remain below the Expected loss rate.

For Corporate exposures, the Historical actual loss rate was impacted by the significant sectoral provisions taken in 2002. This contributed to higher historical default rates and LGD than we are currently experiencing. As a result, Actual loss rate in the 4 quarters ending Q2 2009 was lower than the Historical actual loss rate.

[1] Effective April 30, 2009, the Bank's equity portfolio qualified for the Basel II Framework's equity materiality exemption.

[2] Effective Q2 2009, for both accounting and regulatory reporting purposes, the one month lag in reporting of TD Banknorth and Commerce financial position and results is eliminated by using the same period end as the rest of the Bank. Previously, for Q4 2008 and Q1 2009, TD Banknorth and Commerce assets as at the Bank's period end were used when calculating the Bank's regulatory capital position. Further, effective Q4 2008, for regulatory purposes only, the Bank's investment in TD Ameritrade is translated using the period end foreign exchange rate of the Bank. Accordingly, with the alignment of TD Banknorth and Commerce, effective April 30, 2009, the net impact relates to TD Ameritrade only.

1 In accordance with CICA Handbook s. 3860, the Bank is required to classify certain classes of preferred shares and innovative Tier 1 capital investments as liabilities on the balance sheet. For regulatory capital purposes, these capital instruments have been grandfathered by OSFI and continue to be included in Tier 1 capital.

2 As the Bank is not the primary beneficiary of TD Capital Trust II and IV, these are not consolidated by the Bank. However, they do qualify as Tier 1 regulatory capital.

3 Effective April 30, 2009, for accounting purposes, and effective October 31, 2008 for regulatory reporting purposes, the one month lag in reporting of TD Banknorth and Commerce financial position and results is eliminated as the reporting periods of U.S. entities is aligned with the rest of the Bank. Prior to October 31, 2008, regulatory capital was calculated incorporating TD Banknorth and Commerce assets on a one month lag. Further, effective October 31, 2008, for regulatory purposes only, the Bank's investment in TD Ameritrade is translated using the period end foreign exchange rate of the Bank. Accordingly, with the alignment of the reporting periods of TD Banknorth and Commerce, effective April 30, 2009, the net impact relates to TD Ameritrade only.

4 When expected loss as calculated within the IRB approach exceeds total provisions, the difference is deducted 50% from Tier 1 capital and 50% from Tier 2 capital. When expected loss as calculated within the IRB approach is less than the total provisions, the difference is added to Tier 2 capital.

5 Based on OSFI advisory letter dated February 20, 2007, 100% of substantial investments and investments in insurance subsidiaries held prior to January 1, 2007 (excluding goodwill / intangibles) is deducted from Tier 2 capital. The 50% from Tier 1 capital and 50% from Tier 2 capital deduction has been deferred until 2009 and 2012 for substantial investments and insurance, respectively. Increases in the investment value of insurance subsidiaries and / or substantial investments on or after January 1, 2007 are subject to the 50% from Tier 1 capital and 50% from Tier 2 capital deduction.

6 OSFI's target total capital ratio for Canadian banks is 10%.

7 On a stand-alone basis, TD Bank, N.A., reports regulatory capital to the Office of the Comptroller of the Currency (OCC) under Basel I based on calendar quarter ends. The disclosed capital ratios are based on this framework. Commerce Bank, N.A. and Commerce Bank/North merged into TD Banknorth, N.A. on May 31, 2008. On the same date, TD Banknorth, N.A. changed its legal name to TD Bank, N.A. Prior to this merger, TD Banknorth, N.A. reported Tier 1 and Total capital ratios of 9.4% and 12.2%, respectively, for Q2 2008 and 9.5% and 12.3%, respectively, for Q1 2008; and Commerce Bank, N.A. reported Tier 1 and Total capital ratios of 9.8% and 10.6%, respectively, for Q2 2008 when it was acquired by the Bank.

Risk-weighted Assets

Risk-weighted assets (RWA)	▪ Used in the calculation of risk-based capital ratios. Risk-weighted assets (RWA) are calculated by applying a risk-weight factor ("risk-weight") to the notional amount of each asset. Off-balance sheet amounts are converted to balance sheet (or credit) equivalent amounts using credit conversion factors, before the appropriate risk-weight is applied. The risk-weight is determined by the regulatory approach used.

Approaches used by the Bank to calculate RWA:

For Credit Risk

Standardized Approach	▪ Under this approach, banks use a standardized set of risk-weights as prescribed by the regulator to calculate credit risk capital requirements. Standardized risk-weights are based on external credit assessments, where available, and other risk-related factors, including exposure asset class, collateral, etc.
Advanced Internal Ratings Based (AIRB) Approach	▪ Under this approach, banks use their own internal historical experience of PD, LGD, EAD and other key risk assumptions to calculate credit risk capital requirements. Use of the AIRB approach is subject to supervisory approval.

For Operational Risk

Basic Indicator Approach	▪ Under this approach, banks calculate operational risk capital requirements by applying a prescribed factor of 15% to a three-year average of positive annual gross income.
Standardized Approach	▪ Under this approach, banks apply prescribed risk-weight factors to a three-year average of annual gross income for each of eight different business lines, representing the different activities of the institution (e.g. Corporate Finance, Retail Banking, Asset Management, etc.).

For Market Risk

Internal Models Approach	▪ Under this approach, banks use their own internal risk management models to calculate specific risk and general market risk charges.

Credit Risk Terminology

Gross credit risk exposure	▪ The total amount the bank is exposed to at the time of default measured before specific provisions or write-offs. Includes exposures under both the Standardized and AIRB approach to credit risk.

Counterparty Type / Exposure Classes:

Retail

Residential secured	▪ Includes residential mortgages and home equity lines of credit extended to individuals.
Qualifying revolving retail (QRR)	▪ Includes credit cards, unsecured lines of credit and overdraft protection products extended to individuals (in the case of the Standardized Approach to credit risk, credit card exposures are included in the 'Other retail' category).
Other retail	▪ Includes all other loans (e.g. personal loans, student lines of credit and small business loans) extended to individuals and small businesses.

Non-retail

Corporate	▪ Includes exposures to corporations, partnerships or proprietorships.
Sovereign	▪ Includes exposures to central governments, central banks, multilateral development banks and certain public sector entities.
Bank	▪ Includes exposures to deposit-taking institutions, securities firms and certain public sector entities.

Exposure Types:

Drawn	▪ The amount of funds advanced to a borrower.
Undrawn (commitment)	▪ The difference between the authorized and drawn amounts (e.g. the unused portion of a line of credit / committed credit facility).
Repo-style transactions	▪ Repurchase and reverse repurchase agreements, securities borrowing and lending.
OTC derivatives	▪ Privately negotiated derivative contracts that are not exchange-traded.
Other off-balance sheet	▪ All off-balance sheet arrangements other than derivatives and undrawn commitments (e.g. letters of credit, letters of guarantee).

AIRB Credit Risk Parameters:

Probability of Default (PD)	▪ The likelihood that the borrower will not be able to meet its scheduled repayments within a one year time horizon.
Exposure at Default (EAD)	▪ The total amount the bank is exposed to at the time of default.
Loss Given Default (LGD)	▪ The amount of the loss when a borrower defaults on a loan, which is expressed as a percentage of exposure at default (EAD).

[1] The adjustment for items of note, net of income taxes, is removed from reported results to compute adjusted results.

[2] The Enron contingent liability for which the Bank established a reserve was re-evaluated in light of the favourable evolution of case law in similar securities class actions following the U.S. Supreme Court's ruling in *Stoneridge Partners, LLC v. Scientific-Atlanta, Inc*. Effective October 31, 2008, the Bank recorded an after-tax positive adjustment of $323 million ($477 million before tax), reflecting the substantial reversal of the reserve. For details, see Note 28 to the 2008 audited Consolidated Financial Statements.

[3] Effective August 1, 2008, as a result of recent deterioration in markets and severe dislocation in the credit market, the Bank changed its trading strategy with respect to certain trading debt securities. The Bank no longer intends to actively trade in these debt securities. Accordingly, the Bank reclassified certain debt securities from trading to available-for-sale category in accordance with the Amendments to CICA Section 3855, *Financial Instruments – Recognition and Measurement*. As part of the Bank's trading strategy, these debt securities are economically hedged, primarily with credit default swaps (CDS) and interest rate swap contracts. This includes foreign exchange translation exposure related to the debt securities portfolio and the derivatives hedging it. These derivatives are not eligible for reclassification and are recorded on a fair value basis with changes in fair value recorded in the period's earnings. Management believes that this asymmetry in the accounting treatment between derivatives and the reclassified debt securities results in volatility in earnings from period to period that is not indicative of the economics of the underlying business performance in the Wholesale Banking segment. As a result, the derivatives are accounted for on an accrual basis in Wholesale Banking segment and the gains and losses related to the derivatives in excess of the accrued amounts are reported in the Corporate segment and disclosed as an item of note. Adjusted results of the Bank exclude the gains and losses of the derivatives in excess of the accrued amount.

[4] As part of the global restructuring of Visa USA Inc., Visa Canada Association and Visa International Service Association, which closed on October 3, 2007 (restructuring date), the Bank received shares of the new global entity (Visa Inc.) in exchange for the Bank's membership interest in Visa Canada Association. As required by the accounting standards, the shares the Bank received in Visa Inc. were measured at fair value and an estimated gain of $135 million after tax was recognized in the Corporate segment, based on results of an independent valuation of the shares.

[5] The TD Banknorth restructuring, privatization and merger-related charges include the following: $39 million TD Banknorth restructuring, privatization and merger-related charges included in U.S. Personal and Commercial Banking (which included the following: $31 million restructuring charge, primarily consisted of employee severance costs, the costs of amending certain executive employment and award agreements and write-down of long-lived assets due to impairment; $5 million privatization charges, which primarily consisted of legal and investment banking fees; and $3 million merger-related charges related to conversion and customer notices in connection with the integration of Hudson United Bancorp and Interchange with TD Banknorth. In the Consolidated Statement of Income, the restructuring charges are included in the restructuring costs while the privatization and merger-related charges are included in other non-interest expenses); and $4 million restructuring charge related to the transfer of functions from TD Bank USA to TD Banknorth, included in the Corporate segment.

[6] As a result of the acquisition of Commerce and related restructuring and integration initiatives undertaken, the Bank incurred restructuring and integration charges. Restructuring charges consisted of employee severance costs, the costs of amending certain executive employment and award agreements and the write-down of long-lived assets due to impairment. Integration charges consisted of costs related to employee retention, external professional consulting charges and marketing (including customer communication and rebranding). In the Interim Consolidated Statement of Income, the restructuring and integration charges are included in non-interest expenses. The items of note include the following: Q2 2008: $30 million restructuring and integration charges; Q3 2008: $15 million integration charges; and as a result of the Commerce acquisition, the combined overall tax rate for U.S. Personal and Commercial Banking declined, resulting in a negative impact on the future income tax assets of $14 million related to non-intangible future tax assets; Q4 2008: $25 million integration charges; and Q1 2009: $67 million restructuring and integration charges.

[7] The Bank purchases CDS to hedge the credit risk in Wholesale Banking's corporate lending portfolio. These CDS do not qualify for hedge accounting treatment and, therefore, they are measured at fair value with changes in fair value recognized in current period's earnings. The related loans are accounted for at amortized cost. Management believes that this asymmetry in the accounting treatment between CDS and loans would result in periodic profit and loss volatility which is not indicative of the economics of the corporate loan portfolio or the underlying business performance in Wholesale Banking. As a result, the CDS are accounted for on an accrual basis in Wholesale Banking and the gains and losses on the CDS, in excess of the accrued cost, are reported in the Corporate segment. Adjusted earnings excludes the gains and losses on the CDS in excess of the accrued cost. When a credit event occurs in the corporate loan book that has an associated CDS hedge, the provision for credit losses (PCL) related to the portion that was hedged via the CDS is netted against this item of note. During Q1 2008, the change in the fair value of CDS, net of PCL, resulted in a net gain of $38 million before tax ($25 million after tax). The item of note included a change in fair value of CDS of $55 million before tax ($36 million after tax), net of PCL of approximately $17 million before tax ($11 million after tax).

[8] This represents the negative impact of the scheduled reductions in the income tax rate on reduction of net future income tax assets.

[9] The provision for insurance claims related to a court decision in Alberta. The Alberta government's legislation effectively capping minor injury insurance claims was challenged and held to be unconstitutional. While the Government of Alberta has appealed the decision, the ultimate outcome remains uncertain. As a result, the Bank accrued an additional actuarial liability for potential losses in the first quarter of 2008.

[10] Upon the announcement of the privatization of TD Banknorth in November 2006, certain minority shareholders of TD Banknorth initiated class action litigation alleging various claims against the Bank, TD Banknorth and TD Banknorth officers and directors. The parties agreed to settle the litigation in February 2009 for $61.3 million (US$50 million) of which $3.7 million (US$3 million) had been previously accrued on privatization. A settlement approval hearing with the Court of Chancery in Delaware is scheduled for June 2009.

[11] EPS impact is computed by dividing items of note by the weighted-average number of shares outstanding during the period. As a result, the sum of the quarterly EPS impact may not equal the year-to-date EPS impact.

[12] The diluted earnings per share figures do not include Commerce earnings for the month of April 2008 because there is a one month lag between fiscal quarter ends, while share issuance on close resulted in a one-time negative earnings impact of 4 cents per share.
