# Caution Regarding Forward-Looking Statements

From time to time, the Bank (as defined in this document) makes written and/or oral forward-looking statements, including in this document, in other filings with Canadian regulators or the United States (U.S.) Securities and Exchange Commission (SEC), and in other communications. In addition, representatives of the Bank may make forward-looking statements orally to analysts, investors, the media and others. All such statements are made pursuant to the “safe harbour” provisions of, and are intended to be forward-looking statements under, applicable Canadian and U.S. securities legislation, including the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, statements made in this document, including in the Management’s Discussion and Analysis (“2015 MD&A”) under the heading “Economic Summary and Outlook”, for each business segment under headings “Business Outlook and Focus for 2016”, and in other statements regarding the Bank’s objectives and priorities for 2016 and beyond and strategies to achieve them, the regulatory environment in which the Bank operates and the Bank’s anticipated financial performance. Forward-looking statements are typically identified by words such as “will”, “should”, “believe”, “expect”, “anticipate”, “intend”, “estimate”, “plan”, “may”, and “could”.

By their very nature, these forward-looking statements require the Bank to make assumptions and are subject to inherent risks and uncertainties, general and specific. Especially in light of the uncertainty related to the physical, financial, economic, political, and regulatory environments, such risks and uncertainties – many of which are beyond the Bank’s control and the effects of which can be difficult to predict – may cause actual results to differ materially from the expectations expressed in the forward-looking statements. Risk factors that could cause, individually or in the aggregate, such differences include: credit, market (including equity, commodity, foreign exchange, and interest rate), liquidity, operational (including technology and infrastructure), reputational, insurance, strategic, regulatory, legal, environmental, capital adequacy, and other risks. Examples of such risk factors include the general business and economic conditions in the regions in which the Bank operates; the ability of the Bank to execute on key priorities, including to successfully complete acquisitions, business retention and strategic plans and to attract, develop and retain key executives; disruptions in or attacks (including cyber attacks) on the Bank’s information technology, internet, network access or other voice or data communications systems or services; the evolution of various types of fraud or other criminal behaviour to which the Bank is exposed; the failure of third parties to comply with their obligations to the Bank or its affiliates, including relating to the care and control of information; the impact of new and changes to, or application of, current laws and regulations, including without limitation tax laws, risk-based capital guidelines and liquidity regulatory guidance; the overall difficult litigation environment, including in the U.S.; increased competition, including through internet and mobile banking and non-traditional competitors; changes to the Bank’s credit ratings; changes in currency and interest rates; increased funding costs and market volatility due to market illiquidity and competition for funding; critical accounting estimates and changes to accounting standards, policies, and methods used by the Bank; existing and potential international debt crises; and the occurrence of natural and unnatural catastrophic events and claims resulting from such events. The Bank cautions that the preceding list is not exhaustive of all possible risk factors and other factors could also adversely affect the Bank’s results. For more detailed information, please refer to the “Risk Factors and Management” section of the 2015 MD&A, as may be updated in subsequently filed quarterly reports to shareholders and news releases (as applicable) related to any transactions or events discussed under the heading “Significant Events” in the relevant MD&A, which applicable releases may be found on [www.td.com](http://www.td.com). All such factors should be considered carefully, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements, when making decisions with respect to the Bank and the Bank cautions readers not to place undue reliance on the Bank’s forward-looking statements.

Material economic assumptions underlying the forward-looking statements contained in this document are set out in the 2015 MD&A under the headings “Economic Summary and Outlook”, and for each business segment, “Business Outlook and Focus for 2016”, each as updated in subsequently filed quarterly reports to shareholders.

Any forward-looking statements contained in this document represent the views of management only as of the date hereof and are presented for the purpose of assisting the Bank’s shareholders and analysts in understanding the Bank’s financial position, objectives and priorities and anticipated financial performance as at and for the periods ended on the dates presented, and may not be appropriate for other purposes. The Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by or on its behalf, except as required under applicable securities legislation.

1. The Bank prepares its consolidated financial statements in accordance with International Financial Reporting Standards (IFRS), the current generally accepted accounting principles (GAAP), and refers to results prepared in accordance with IFRS as the "reported" results. The Bank also utilizes non-GAAP financial measures referred to as "adjusted" results (i.e. reported results excluding "items of note", net of income taxes) to assess each of its businesses and measure overall Bank performance. Adjusted net income, adjusted earnings per share (EPS) and related terms used in this presentation are not defined terms under GAAP and may not be comparable to similar terms used by other issuers. See "How the Bank Reports" in the Bank's Fourth Quarter 2015 Earnings News Release and MD&A ([td.com/investor](http://td.com/investor)) for further explanation, reported basis results, a list of the items of note, and a reconciliation of non-GAAP measures. Q4 2015 reported net income and EPS were \$1,839MM and \$0.96, respectively. Q4 2015 reported net income increased 5% YoY and Q4 2015 reported EPS increased 5% YoY.

<b>Adjusted<sup>4</sup> net income and EPS (diluted)</b>		<b>\$2,177</b>	<b>\$1.14</b>

1. The Bank undertook certain measures in the fourth quarter of 2015 to reduce costs and manage expenses in a sustainable manner and to achieve greater operational efficiencies. These measures included process redesign and business restructuring, retail branch and real estate optimization, and organizational review.

2. Includes amortization of intangibles expense of \$16MM, net of tax, for TD Ameritrade Holding Corporation. Amortization of intangibles relate to intangibles acquired as a result of asset acquisitions and business combinations. Although the amortization of software and asset servicing rights are recorded in amortization of intangibles, they are not included for purposes of the items of note.

3. On October 1, 2015, the Bank acquired substantially all of Nordstrom's existing U.S. Visa and private label consumer credit card portfolio and became the primary issuer of Nordstrom credit cards in the U.S. The transaction was treated as an asset acquisition and the difference on the date of acquisition of the transaction price over the fair value of assets acquired has been recorded in non-interest income. In addition, the Bank incurred set-up, conversion and other one-time costs related to integration of the acquired cards and related program agreement.

4. Adjusted results are defined in footnote 1 on slide 3.

## Key Themes

- **Adjusted<sup>1</sup> net income up 10% YoY**

## Background

- Corporate segment includes:
  - Net treasury and capital management related activities
  - Corporate expenses and other items not fully allocated to operating segments

## Highlights

- Basel III Common Equity Tier 1 ratio 9.9%
- Decrease QoQ driven mainly by Q4 restructuring charge and RWA growth
- Leverage ratio of 3.7%
- Liquidity coverage ratio of 126%
- Announced an NCIB for up to 9.5 million shares or approximately \$500 million of common shares, subject to regulatory approval

## Basel III Common Equity Tier 1<sup>1</sup>

Remain well-positioned  
for evolving regulatory  
and capital environment

1. Amounts are calculated in accordance with the Basel III regulatory framework, excluding Credit Valuation Adjustment (CVA) capital in accordance with OSFI guidance and are presented based on the "all-in" methodology. Effective January 1, 2014, the CVA capital charge is phased in over a five year period based on a scalar approach whereby a CVA capital charge of 57% applies in 2014, 64% in 2015 and 2016, 72% in 2017, 80% in 2018 and 100% in 2019.

- Earlier this year we announced a comprehensive review of parts of TD's operating business and corporate functions and in Q2 2015 we recorded restructuring charges of \$337MM pre-tax / \$228MM after-tax
- During Q4 2015 we completed this review and recorded a further charge
- The focus of the Q4 2015 review was similar to that described in Q2 2015 (process redesign and business restructuring, retail branch and real estate optimization and organizational review)

## How much is the charge?

- \$349MM pre-tax / \$243MM after-tax in Q4
- YTD \$686MM pre-tax / \$471MM after-tax

## Expected impact on expenses?

- Ongoing annual cost savings of ~\$600MM once fully realized in 2017
- Will help moderate the rate of expense growth over time, given increases in necessary investments to grow and higher base costs

## Areas Impacted?

- Broad-based review across all businesses and corporate functions

# Credit Portfolio Highlights

## Highlights

- Ongoing good performance and volume growth across the broad portfolio
  - PCL ratio increase of 7 bps largely attributed to:
    - 3 bps due to one-time provisions for South Carolina floods
    - An increase in incurred but not yet identified provision for losses due to volume growth
  - Well within the expected range of PCL in the current credit environment

Solid credit quality
