

Supplemental Regulatory Disclosure

For the Third Quarter Ended July 31, 2020

For further information, please contact: TD Investor Relations 416-308-9030 www.td.com/investor

Gillian Manning – Head, Investor Relations (<u>gillian.manning@td.com</u>) Chris Bury – AVP, Investor Relations (<u>chris.bury@td.com</u>)

Introduction

The information contained in this package is designed to facilitate the readers' understanding of the capital requirements of TD Bank Group ("TD" or the "Bank"). This information should be used in conjunction with the Bank's third quarter 2020 Report to Shareholders, Earnings News Release, Investor Presentation, and the Supplemental Financial Information package, as well as the Bank's 2019 Annual Report. For Basel-related terms and acronyms used in this package, refer to the "Glossary – Basel" and "Acronyms" pages, respectively.

How the Bank Reports

The Bank prepares its Consolidated Financial Statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board, the current generally accepted accounting principles, and refers to results prepared in accordance with IFRS as "reported" results.

As noted in the Pillar 3 disclosure Index on the following pages, the disclosures are grouped by topic. Of note, Credit Risk consists of credit risk exposures excluding counterparty credit risk (CCR) and includes drawn, undrawn and other off-balance sheet exposures whereas CCR includes repo-style transactions and derivative exposures. The glossary provides additional details of items included in these exposure types.

Risk-weighted assets (RWA) disclosed in each disclosure include the 6% Office of the Superintendent of Financial Institutions (OSFI) prescribed scaling factor, where applicable.

Pillar 3 Disclosure Requirements – In January 2015, the Basel Committee on Banking Supervision (BCBS) published the standard for the *Revised Pillar 3 Disclosure Requirements* (Revised Basel Pillar 3 standard). The Revised Basel Pillar 3 standard aim to address the problems identified through the financial crisis and to improve comparability and consistency of financial regulatory disclosures through more standardized formats between banks and across jurisdictions. Furthermore, OSFI issued the Pillar 3 Disclosure Requirements guideline April 2017, effective October 31, 2018. The index below includes disclosure requirement per the BCBS document (and required by OSFI) and lists the location of the related disclosures presented in the third quarter 2020, Report to Shareholders (RTS), or Supplemental Financial Information (SFI), or Supplemental Regulatory Disclosures (SRD). Information on TD's website, SFI, and SRD is not and should not be considered incorporated herein by reference into the 2019 Annual Report, Management's Discussion and Analysis, or the Consolidated Financial Statements.

³ The Financial Stability Board (FSB), in consultation with BCBS and national authorities, has identified the 2019 list of G-SIBs, using 2018 fiscal year-end data. The Bank was identified as a G-SIB on November 22, 2019. ⁴ The countercyclical buffer surcharge is in effect.

⁵ Common equity capital G-SIB surcharge is in effect.

⁶ Reflects Pillar 1 targets and does not include Pillar 2 domestic stability buffer. Effective the second quarter of 2020, the buffer is 1%.

 Legal entities excluded from the regulatory scope of consolidation included the following inscrance subsidiaries: Meloche Monnex Inc. (consolidated), TD Life Insurance Company, and TD Reinsurance (Barbados) Inc. which have total assets included in the consolidated Bank of \$8.6 billion and total equity of \$2.0 billion, of which \$376 million is deducted from additional Tier 1, and \$160 million is deducted from tier 2 capital. Cross referenced (L3, R, V) respectively, to the Capital Position – Basel III on pages 1 and 2.
 ³ Tris adjustment is reliated to deferred for financial accounting purposes.
 ⁵ Included in current cap on additional Tier 1 instruments is \$1.2 billion related to TD Capital Trust IV (no longer consolidated as the Bank is not the

¹ Consistent with the scope of the Canadian statutory Bail-in Regime, Bail-in Debt is subordinated to Other Liabilities. Under the Bail-in Regime, Bail-in Debt which would ordinarily rank equally to Other Liabilities in liquidation, is subject to conversion under statutory resolution powers whereas Other Liabilities are not subject to such conversion.

² Completion of this column is not required by OSFI at this time.

RWA includes 6% scalar when appropriate.
 ² Minimum capital requirements equal 8% of RWA.
 ³ As of the third quarter of 2020, the non-retail portfolios in the U.S. Retail segment have been approved for use of the AIRB approach for RWA.
 ⁴ Includes other assets and equities which use a regulatory prescribed risk weight.
 ⁵ Includes qualifying central counterparties (QCCPs), CVA and repo style transactions.
 ⁶ As of fiscal 2020, OSFI requires Operational Risk RWA to be calculated under The Standardized Approach (TSA).

¹ Non-counterparty credit risk includes loans and advances to individuals and small business retail customers, wholesale and commercial corporate customers, and banks and governments, as well as holdings of debt, equity securities, and other assets including prepaid expenses, deferred income taxes, land, building, equipment, and other depreciable property.

Reflects Pillar 3 requirements for RWA flow statements of credit risk exposures under IRB (CR8) which excludes securitization and equity.

³ CCR is comprised of over-the-counter (OTC) derivatives, repo-style transactions, trades cleared through central counterparties, and CVA RWA.

⁴ The Asset size category consists of organic changes in book size and composition (including new business and maturing loans), and for the third quarter of 2020, decreased in various portfolios in the U.S. Retail, and Wholesale Banking segments.

⁵ The Asset quality category includes quality of book changes caused by experience such as underlying customer behaviour or demographics, including changes through model calibrations/realignments, and for the third quarter of 2020, decreased mainly due to various portfolios in Canadian Retail as well as savings from the annual update of Canadian non-retail credit risk parameters.

⁶ The Model updates category relates to model implementation, changes in model scope, or any changes to address model malfunctions. Effective the third quarter of 2020, the non-retail portfolios in the U.S. Retail segment have been approved for use of the AIRB approach for calculating RWA.

⁷ The Methodology and policy category impacts reflect newly adopted methodology changes to the calculations driven by regulatory policy changes, such as new regulations.

* Foreign exchange movements are mainly due to a change in the U.S. dollar foreign exchange rate for the U.S. portfolios in the U.S. Retail and Wholesale Banking segments.

⁹ The Other category consists of items not described in the above categories, including changes in exposures not included under advanced or standardized methodologies, such as prepaid expenses, deferred income taxes, land, building, equipment and other depreciable property, and other assets.

¹ The Movement in risk levels category reflects changes in risk due to position changes and market movements. The increase in RWA is mainly due to the VaR models being impacted by the new scenarios' shocks rolling into the most recent 259 days trading window this quarter. There were no material position changes.

² The Model updates category reflects updates to the model to reflect recent experience and change in model scope.

³ The Methodology and policy category reflects newly adopted methodology changes to the calculations driven by regulatory policy changes.

⁴ Foreign exchange movements and other are deemed not meaningful since RWA exposure measures are calculated in Canadian dollars. Therefore, no foreign exchange translation is required.

⁵ Not meaningful.

| Methodology and policy ⁴ | 5 | | - | - | - | - | - | - |
| Acquisitions and disposals | 6 | | - | - | - | - | - | - |
| Foreign exchange movements and other ⁵ | 7 | | - | - | - | (55) | (417 | 7) |
| RWA, balance at end of period | 8 | \$ | 58,112 | \$ 57,429 | \$ 56,242 | \$ 55,606 | \$ 54,857 | 7 |

¹ The movement in Revenue generation category is due to a change in the three-year average of annual gross income used in TSA.

² The Movement in risk levels category primarily reflects changes in risk due to operational loss experience, business environment, internal control factors, and scenario analysis.

³ The Model updates category relates to model implementation, changes in model scope, or any changes to address model malfunctions.

⁴ The Methodology and policy category reflects newly adopted methodology changes to the calculations driven by regulatory policy changes.

⁵ Foreign exchange movements are mainly due to a change in the U.S. dollar foreign exchange rate for the U.S. portfolios in the U.S. Retail segment.

for credit losses on SA exposures:

Of which ECL

¹ Excludes insurance subsidiaries, securitization exposures, assets at fair value through profit or loss (FVTPL), and acquired credit-impaired (ACI) loans.

² Restructured exposures as at July 31, 2020 are \$1,021 million (April 30, 2020 - \$1,107 million; January 31, 2020 - \$1,070 million; October 31, 2019 - \$1,068 million), of which \$537 million (April 30, 2020 - \$564 million; January 31, 2020 - \$532 million; October 31, 2019 - \$545 million) is considered impaired.

³ Includes total impaired exposures, of which \$2,525 million (April 30, 2020 - \$2,200 million; January 31, 2020 - \$1,864 million; October 31, 2019 - \$1,535 million) is in the default category and \$1,296 million as at July 31, 2020. (\$1,406 million as at April 30, 2020; January 31, 2020 - \$1,343 million; October 31, 2019 - \$1,497 million) is in the high risk/watch and classified categories.

Gross carrying values of:

⁴ Includes Stage 1, 2, and 3 allowances.

⁵ Specific consists of Stage 3 expected credit loss allowances. General consists of Stage 1 and Stage 2 expected credit loss allowances.

Credit Quality of Assets (CR1) (Continued)^{1,2}

¹ Gross credit risk exposure is before credit risk mitigants. This table excludes securitization, equity, and other credit RWA.

² Gross exposure on undrawn commitments is EAD which is the amount currently undrawn but expected to be drawn assuming a default on the underlying committed loan agreement.

2020

¹ As of the third quarter of 2020, the non-retail portfolio in the U.S. Retail segment was approved for use of AIRB methodology. Given the size of the portfolio and unique related credit risk parameters, the corporate asset classes have been disclosed separately. The bank and sovereign asset class distributions and related risks do not vary significantly between portfolios, therefore these asset classes are presented on a consolidated basis and display the Canadian mapping to external ratings.

Excludes counterparty exposures (derivative and repo-style transactions).

Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

Exposures based on obligors prior to CRM.

Exposures after CRM reflecting guarantor.

^e Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.

⁷ Total RWA to post-CRM EAD.

⁸ Includes Canadian Retail, Wholesale Banking and Corporate segments.

IRB – Credit Risk Exposures by Portfolio and PD Range (CR6) – Corporate (Continued)¹

¹ Excludes CCR exposures (derivative and repo-style transactions).

² Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

³ Exposures based on obligors prior to CRM.

⁴ Exposures after CRM reflecting guarantor.

⁵ Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.

⁶ Total RWA as a percentage of post-CRM EAD.

IRB – Credit Risk Exposures by Portfolio and PD Range (CR6) – Residential Secured

¹ Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

² Exposures based on obligors prior to CRM.

³ Exposures after CRM reflecting guarantor.

⁴ Number of retail accounts.

⁵ Average maturity is not used in the calculation of retail exposure RWA.

⁶ Total RWA as a percentage of post-CRM EAD.

⁷ Includes residential mortgages and home equity lines of credit (HELOCs). Insured classification reflects when insurance on the exposure is used for CRM for reduction of RWA.

* Includes government insured exposures (CMHC) and exposures insured by corporate entities. For post-CRM, government insured exposures are included in Sovereign.

¹ Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

² Exposures based on obligors prior to CRM.

³ Exposures after CRM reflecting guarantor.

⁴ Number of retail accounts.

⁵ Average maturity is not used in the calculation of retail exposure RWA.

⁶ Total RWA as a percentage of post-CRM EAD.

⁷ Includes residential mortgages and HELOCs. Insured classification reflects when insurance on the exposure is used for CRM for reduction of RWA.

* Includes government insured exposures (CMHC) and exposures insured by corporate entities. For post-CRM, government insured exposures are included in Sovereign.

Q3

¹ Collateral for repo-style transactions is reflected in the LGD as opposed to EAD.

² Prescribed PD bands based on Pillar 3 disclosure requirements by BCBS.

³ Total number of obligors is total number of unique borrowers and may not add as certain borrowers may be represented in more than one PD scale.

² Derivatives executed through a central clearing house reduces settlement risk due to the ability to net settle offsetting positions for capital purposes and therefore receive preferential capital treatment compared to those settled with non-central clearing house counterparties.

³ Certain non-trading interest rate swaps novated to clearing houses have been terminated during the period ended January 31, 2020.

¹ Collateral held under a CSA to help reduce CCR is in the form of high-quality and liquid assets such as cash and high-quality government securities. Acceptable collateral is governed by the Collateralized Trading Policy. ² Derivatives executed through a central clearing house reduces settlement risk due to the ability to net settle offsetting positions for capital purposes and therefore receive preferential capital treatment compared to those settled with non-central clearing house counterparties.

Non-trading credit derivatives, which are given financial guarantee treatment for credit risk capital purposes, were excluded in accordance with OSFI's guidelines.
 RWA for OSFI "deemed" QCCP derivative exposures are calculated in accordance with the Basel III regulatory framework, which takes into account both trade exposures and default fund exposures relating to derivatives, are presented based on the "all-in" methodology. The amounts calculated are net of master netting agreements and collateral.

¹ Estimated PD reflects a one-year through-the-cycle time horizon and is based on long run economic conditions.
 ² Estimated LGD reflects loss estimates for the full portfolio under a severe downturn economic scenario.
 ³ Represents average LGD of the impaired portfolio over trailing 12 months.
 ⁴ LGD for the residential secured insured portfolio is n/a due to the effect of CRM from government backed entities.

Glossary – Basel

| Risk-weighted assets (RWA) | Used in the calculation of risk-based capital ratios, total risk-weighted assets are calculated for credit, operational, and market risks using the approaches described below. | |
|--|--|--|
| Approaches used by the Bank to calculate RWA | | |
| For Credit Risk | | |
| Standardized Approach (SA) | Under this approach, banks apply a standardized set of risk-weights to exposures, as prescribed by the regulator, to calculate credit risk capital requirements. Standardized risk-weights are based on external credit assessments, where available, and other risk-related factors, including exposure asset class and collateral. | |
| Advanced Internal Ratings-Based (AIRB) Approach | nder this approach, banks use their own internal historical experience of PD, LGD, EAD, and other key risk assumptions to calculate credit risk capital equirements. Use of the AIRB approach is subject to supervisory approval. | |
| For Operational Risk | | |
| Advanced Measurement Approach (AMA) The Standardized Approach (TSA) | Under this approach, banks use their own internal operational risk measurement system with quantitative and qualitative criteria to calculate operational risk capital. Under this approach, banks apply prescribed factors to a three-year average of annual gross income for each of eight different business lines representing the different activities of the institution (such as, Corporate Finance, Retail Banking, Asset Management). | |
| For Market Risk | | |
| Standardized Approach Internal Models Approach (IMA) | er this approach, banks use standardized capital charges prescribed by the regulator to calculate general and specific risk components of market risk. er this approach, banks use their own internal risk management models to calculate specific risk and general market risk charges. | |
| Credit Risk Terminology | | |
| Gross credit risk exposure | The total amount the Bank is exposed to at the time of default measured before counterparty-specific provisions or write-offs. Includes exposures under both the Standardized and AIRB approaches to credit risk. | |
| Counterparty Type / Exposure Classes: Retail | | |
| Residential Secured | Includes residential mortgages and home equity lines of credit extended to individuals. | |
| Qualifying Revolving Retail (QRR) | Includes credit cards, unsecured lines of credit, and overdraft protection products extended to individuals (in the case of the Standardized Approach to credit risk, credit card exposures are included in the "Other Retail" category). | |
| Other Retail | Includes all other loans (such as personal loans, student lines of credit, and small business loans) extended to individuals and small businesses. | |
| Non-retail | | |
| Corporate | Includes exposures to corporations, partnerships, or proprietorships. | |
| Sovereign Bank | Includes exposures to central governments, central banks, multilateral development banks, and certain public sector entities. Includes exposures to deposit-taking institutions, securities firms, and certain public sector entities. | |
| Exposure Types: | | |
| Drawn | The amount of funds advanced to a borrower. | |
| Undrawn (commitment) | The difference between the authorized and drawn amounts (for instance, the unused portion of a line of credit/committed credit facility). | |
| Repo-style transactions | Repurchase and reverse repurchase agreements, securities borrowing and lending. | |
| OTC derivatives | Privately negotiated derivative contracts. | |
| Other off-balance sheet | All off-balance sheet arrangements other than derivatives and undrawn commitments (such as letters of credit, letters of guarantee). | |
| AIRB Credit Risk Parameters: | | |
| Probability of Default (PD) | The likelihood that the borrower will not be able to meet its scheduled repayments within a one year time horizon. | |
| Exposure at Default (EAD) | The total amount the Bank is exposed to at the time of default. | |
| Loss Given Default (LGD) | The amount of the loss when a borrower defaults on a loan, which is expressed as a percentage of EAD. | |
| Credit Valuation Adjustment (CVA) | CVA represents a capital charge that measures credit risk due to default of derivative counterparties. This charge requires banks to capitalize for the potential changes in counterparty credit spread for the derivative portfolios. | |
| Common Equity Tier 1 (CET1) | This is a primary Basel III capital measure comprised mainly of common equity, retained earnings and accumulated other comprehensive income (loss). Regulatory deductions made to arrive at the CET1 Capital include, goodwill and intangibles, unconsolidated investments in banking, financial, and insurance entities, deferred tax assets, defined benefit pension fund assets, and shortfalls in allowances. | |
| CET1 Ratio | CET1 ratio represents the predominant measure of capital adequacy under Basel III and equals CET1 Capital divided by CET1 Capital RWA. | |
| Return on Common Equity Tier 1 (CET1) Capital risk-weighted assets | Net income available to common shareholders as a percentage of average CET1 Capital RWA. | |
| Liquidity Coverage Ratio (LCR) | LCR is calculated by dividing the total stock of unencumbered high-quality liquid assets by the expected next 30-day stressed cash outflow. | |
| Countercyclical Capital Buffer (CCB) | CCB is an extension of the capital conservation buffer which takes into account the macro-financial environment in which the banks operate and aims to protect the banking sector against future potential losses during periods of excess aggregate credit growth from a build-up of system-wide risk. The Bank's CCB will be a weighted average of the buffers deployed across jurisdictions to which the institution has private sector credit exposures. | |
